Smart airports

and innovations in multimodality

A PROJECTS INFO PACK BY CORDIS

Smarter airports and seamless mobility Powered by SESAR

Airports are at the heart of Europe's transport system. The SESAR Joint Undertaking is working to deliver smarter, more sustainable and connected mobility, transforming airport operations and linking air travel with other transport modes. This Projects Info Pack highlights 12 SESAR-supported projects enhancing airside efficiency, improving traffic management in and around airports, and enabling seamless multimodal journeys.
