▼**M2**

(*) Limit of analytical determination

(**) Pesticide-code combination for which the MRL as set in Annex III Part B applies.

►**M7** ([1]) Temporary MRLs valid until 1 June 2010, pending the European Food Safety Authority's residue data opinion. After this date the MRL will be 0,1 mg/kg, unless modified by a Regulation. ◄

([2]) Temporary MRL valid until 18 September 2008. After this date the MRL will be 0,05 (*) mg/kg unless modified by a Directive or a Regulation.

([3]) Temporary MRL valid until 31 December 2008 to accomodate and essential use in accordance with regulation 2076/2002/EC.

([13]) As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propineb, ziram and/or thiram is required.

►**M5** ([14]) Monitoring data show that levels up to 0,02 mg/kg of dieldrin can be found in pumpkin seeds used for oil extraction. ◄

([a]) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

([F]) = Fat soluble

([R]) = The residue definition differs for the following combinations pesticide-code number:

►**M40** 2,4-DB-code 1000000 except 1040000: sum of 2,4-DB and its conjugates, expressed as 2,4-DB ◄

►**M21** Carbendazim — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim ◄

Chlordane — code 1000000: Sum of cis- and trans-isomers and oxychlordane expressed as chlordane

►**M5** Clofentezine — codes 0500000 and 1000000: Sum of all compounds containing the 2-chlorobenzoyl moiety expressed as clofentezine ◄

►**M37** Metabolite 490M1 = 2-methoxyimino-2-[2-(o-tolyloxymethyl)phenyl]acetic acid. Metabolite 490M9 = 2-[2-(4-hydroxy-2-methylphenoxymethyl)phenyl]-2-methoxy-iminoacetic acid ◄

▼M2

Milbemectin — code 0500000: Milbemectin

►M21 Thiofanate-methyl — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim ◄

►M103 (°) Relevant metabolites are 2-keto–ethofumesate, open-ring-2-keto-ethofumesate and its conjugate, expressed as ethofumesate ◄

▼M149

**Captan (Sum of captan and THPI, expressed as captan) (R)**

(R) = The residue definition differs for the following combinations pesticide-code number:

code 1000000 except 1040000: Sum of THPI, 3-OH THPI and 5-OH THPI, expressed as captan; code 0151020: captan

▼M85

**Dithiocarbamates (dithiocarbamates expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram)**

**In brackets the origin of the residue (ma: maneb; mz: mancozeb; me: metiram; pr: propineb; t: thiram; z: ziram).**

The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

**Fluoride ion**

A) The European Food Safety Authority identified some information on analytical methods as unavailable. Occurrence data show that a lower MRL than 0.2 mg/kg is currently not achievable. Further data are necessary to monitor this level over time in view of its possible reduction. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 July 2024, or, if that information is not submitted by that date, the lack of it. B) A maximum residue level of 3 mg/kg was set to reflect the authorised use of fluoride ion for fumigation of dry raisins. The European Food Safety Authority identified some information on studies on the nature of residues in food matrices upon fumigation and general toxicity as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 July 2024, or, if that information is not submitted by that date, the lack of it.

|---|---|
| **0211000** | **(a) potatoes** |

There is evidence that 1,4-dimethylnaphthalene could naturally occur in some plant compounds. Based on currently available monitoring data a temporary MRL is set at a value of 0.05 mg/kg pending the submission of further monitoring data to confirm it. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 6 March 2025, or, if that information is not submitted by that date, the lack of it.

**0231010** **Tomatoes**

**0231030** **Aubergines/eggplants**

**0232010** **Cucumbers**

**0232030** **Courgettes**

**0233010** **Melons**

**0233020** **Pumpkins**

**0233030** **Watermelons**

**0500070** **Rye**

**0500090** **Wheat**

**0900010** **Sugar beet roots**

The European Food Safety Authority identified some information on residues of metabolites in rotational crops as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 6 March 2025, or, if that information is not submitted by that date, the lack of it.

**0232020** **Gherkins**

The European Food Safety Authority identified some information on residue trials including analysis of metabolites as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 6 March 2025, or, if that information is not submitted by that date, the lack of it.

**0255000** **(e) witloofs/Belgian endives**

The European Food Safety Authority identified some information on residue trials including analysis of parent and metabolites and residues of metabolites in rotational crops as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 6 March 2025, or, if that information is not submitted by that date, the lack of it.

**0270050** **Globe artichokes**

The European Food Safety Authority identified some information on residue trials including analysis of parent and metabolites, storage stability of metabolites, and residues of metabolites in rotational crops as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 6 March 2025, or, if that information is not submitted by that date, the lack of it.

**0401060** **Rapeseeds/canola seeds**

The European Food Safety Authority identified some information on residue trials including analysis of parent as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 6 March 2025, or, if that information is not submitted by that date, the lack of it.

**0900030** **Chicory roots**

▼M2

*ANNEX III*

**Temporary MRLs referred to in Articles 16(1) and 22(1)**

PART A

**Temporary MRLs for substances without MRLs under Directives 86/362/EEC, 86/363/EEC and 90/642/EEC**

*Pesticide residues and maximum residue levels (mg/kg)*

| Code number | Groups and examples of individual products to which the MRLs apply [a] | ▼M73 — ▲M73 | ▼▼C11 — ▲M102 ▲C11 — ▲M102 | ▼▼C11 — ▲M102 ▲C11 — ▲M102 | ▼M197 — ▲M197 | ▼M74 — ▲M74 | ▼M107 — ▲M107 | ▼M124 — ▲M124 |
