The following MRLs apply to dried wild mushrooms: 2,3 mg/kg for ceps, 1,2 mg/kg for dried wild mushrooms other than ceps. Recent monitoring data show that residues of nicotine occurs in dried ceps and dried wild mushrooms other than ceps. Scientific evidence is not conclusive to demonstrate that nicotine occurs naturally in the concerned crop and to elucidate its mechanism of formation. When re-viewing the MRL, the Commission will take into account the information, if it is submitted by 25 July 2029, or, if that information is not submitted by that date, the lack of it.

**0280020** **Wild fungi**

Scientific evidence is not conclusive to demonstrate that nicotine occurs naturally in the concerned crop and to elucidate its mechanism of formation. Temporary MRL valid until 22 February 2026. After this date the MRL will be 0,4 mg/kg unless further modified by a Regulation in light of new information provided by 30 June 2025 at the latest.

**0610000** **Teas**

|---|---|
| **0280010** | **Cultivated fungi** |

▼M158

**Chlorate (A)**

(A) To take into account the specific situation of chlorate residues, in processed food (including for the purpose of this Regulation foodstuffs that have been derived using processes listed in Article 2(1)(n) of Regulation (EC) No 852/2004), that has come in contact with products containing chlorate residues, or that contains ingredients with such residues, such as processing aids or drinking water, used in compliance with the respective legal requirements, these additional contributions of chlorate residues should be taken into account when determining the permitted content of chlorate residues in or on the processed food products in accordance with Article 20 (1) of this Regulation. The burden of proof regarding the level of those additional contributions lies with the food and feed business operator.

(+) Includes raw milk, heat-treated milk and milk for the manufacture of milk-based products as defined in Regulation (EU) No 1308/2013. The MRL applies to milk ready for use (marketed as such or reconstituted as instructed by the manufacturer)

| | |
|---|---|
| **1020010** | **Cattle** |

**Chlorpropham (R) (F)**

(R) The residue definition differs for the following combinations pesticide-code number: Chlorpropham - codes 1016000 and 1030000: chlorpropham and 3-chloro-4-hydroxyaniline conjugates, expressed as chlorpropham; Chlorpropham - code 1000000 except 1016000, 1030000 and 1040000 : Chlorpropham and 4'-hydroxychlorpropham-O-sulphonic acid (4-HSA),expressed as chlorpropham

(F) Fat soluble

Monitoring data show that there may be a contamination of potatoes above the default MRL of 0.01 mg/kg when stored in facilities with a history of chlorpropham use. This temporary MRL will be reviewed based on monitoring data submitted to the Commission by 31 December 2022 and thereafter by 31 December of each subsequent year. Food business operators should submit a report on the development and implementation of cleaning practices to the Commission together with the monitoring data by 31 December 2022, and updates to it in the subsequent years.

| | |

▼M2

([13]) As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propineb, ziram and/or thiram is required.

([a]) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(*) Limit of analytical determination

([F]) = Fat soluble

([R]) = The residue definition differs for the following combinations pesticide-code number:

▼M2

---

Carbendazim — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim

Chlordane — code 1000000: Sum of cis- and trans-isomers and oxychlordane expressed as chlordane

►M37 Metabolite 490M1 = 2-methoxyimino-2-[2-(o-tolyloxymethyl)phenyl]acetic acid. Metabolite 490M9 = 2-[2-(4-hydroxy-2-methylphenoxymethyl)phenyl]-2-methoxy-iminoacetic acid. ◄

Thiofanate-methyl — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim

▼M64

**Carbaryl (F)**

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

▼M209

**Profenofos (F)**

(F) Fat soluble

Recent monitoring data show that residues of profenofos occur in rose petals. Further monitoring data is necessary to compare the evolution of the occurrence of profenofos in rose petals. When re-viewing the MRL, the Commission will take into account the information, if it is submitted by 25 July 2029, or, if that information is not submitted by that date, the lack of it.

| | |
|---|---|
| **0631030** | **Rose** |

Recent monitoring data show that residues of profenofos still occur in herbs and edible flowers. Further monitoring data is necessary to compare the evolution of the occurrence of profenofos in herbs and edible flowers. When re-viewing the MRL, the Commission will take into account the information, if it is submitted by 22 February 2030, or, if that information is not submitted by that date, the lack of it

(R) = The residue definition differs for the following combinations pesticide-code number:

Chlorothalonil - codes 1000000 to 1070000, except 1040000: 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701)

**Pymetrozine (R)**

(R) = The residue definition differs for the following combinations pesticide-code number: Pymetrozine - code 1020000: pymetrozine, 6-hydroxymethylpymetrozine and its phosphate conjugate, expressed as pymetrozine

▼M184

**Propineb and its reaction products that are cleaved to propane-1,2-diamine (PDA), expressed as PDA (R)**

(R) = The residue definition differs for the following combinations pesticide-code number:

Propineb - code 1000000 except 1020000 and 1040000: Propylenethiurea (PTU), free

Propineb - code 1020000: Propylenethiurea (PTU) free and conjugated

As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case-by-case basis when the specific quantification of propineb, ziram and/or thiram is required.

▼M200

**Thiram (expressed as thiram)**

(O) As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propineb, ziram and/or thiram is required.

▼M203

**Bromoxynil and its salts, expressed as bromoxynil**

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 October 2016, or, if that information is not submitted by that date, the lack of it.

**0700000 HOPS**

**Epoxiconazole (F)**

(F) Fat soluble

▼**M205**

**Triflumizole: Triflumizole and metabolite FM-6-1(N-(4-chloro-2-trifluoromethylphenyl)-n-propoxyacetamidine), expressed as Triflumizole (R) (F)**

(R) The residue definition differs for the following combinations pesticide-code number: triflumizole - code 100000 , except 1040000 : triflumizole (F)

(F) Fat soluble

▼**M210**

**Novaluron (sum of constituent isomers) (F)**

(F) Fat soluble

▼**M212**

**Bromopropylate (F)**

(F) Fat soluble

**Chloridazon (sum of chloridazon and chloridazon-desphenyl, expressed as chloridazon) (R)**

(R) The residue definition differs for the following combinations pesticide-code number: Chloridazon - code 1000000 except 1040000: Chloridazon (chloridazon-desphenyl, expressed as chloridazon)

*ANNEX VII*

**Active substance/product combinations, as referred to in Article 18(3)**

| Active substance | Product in Annex I (Code number) |
|---|---|
| Hydrogen phosphide | Fruit (0100000), Vegetables (0200000), Pulses (0300000), Oilseeds and oil fruits (0400000), Cereals (0500000), Tea, coffee, herbal infusions and cocoa (0600000), Spices (0800000). |
| Aluminiumphosphide | Fruit (0100000), Vegetables (0200000), Pulses (0300000), Oilseeds and oil fruits (0400000), Cereals (0500000), Tea, coffee, herbal infusions and cocoa (0600000), Spices (0800000). |
| Magnesiumphosphide | Fruit (0100000), Vegetables (0200000), Pulses (0300000), Oilseeds and oil fruits (0400000), Cereals (0500000), Tea, coffee, herbal infusions and cocoa (0600000), Spices (0800000). |
| Sulfurylfluoride | Fruit (0100000), Cereals (0500000). |
