CHAPTER 11 — LEVIES AND OTHER DUTIES PROVIDED FOR UNDER THE COMMON ORGANIZATION OF THE MARKETS IN SUGAR (ARTICLE 2 (1) (a) OF DECISION 88/376/EEC, EURATOM)

Article Item	Remarks
110	Council Regulation (EEC) No 1785/81 of 30 June 1981 on the common organization of the markets in the sugar sector (OJ No L 177, 1. 7. 1981, p. 4), as last amended by Regulation (EC) No 133/94 (OJ No L 22, 27. 1. 1994, p. 7). Under the common organization of the market in the sugar sector, sugar producers pay production levies to cover market support expenditure. However, the application of a ceiling to the levies as provided for in Article 28 of basic Regulation (EEC) No 1785/81 may lead to their not fully covering the estimated total loss due to the existence of an exportable surplus calculated in accordance with paragraphs 1 and 2 of the said Regulation.

Article Item	Remarks
1 1 1	A system of equalization of storage costs has been set up to ensure regular marketing of sugar throughout the year: the storage levies are thus intended to compensate, on a multiannual basis, for expenditure incurred in the reimbursement of storage costs referred to in Item B1-1 1 1 0 of the statement of expenditure of Section III 'Commission'.

Council Regulation (EC) No 133/94 of 24 January 1994 amending Regulation (EEC) No 1785/81 on the common organization of the markets in the sugar sector (OJ No L 22, 27. 1. 1994, p. 7).

Continuation of the existing production quota arrangements for sugar for the 1994/95 marketing year requires that similar arrangements be applied to the production of inulin syrup, a direct sustitute for isoglucose and liquid sugar, to prevent this product from disturbing a market which, because of the surplus, could further increase the export costs of sugar and isoglucose producers alone.

Council Decision 94/729/EC of 31 October 1994 on budgetary discipline (OJ No L 293, 12. 11. 1994, p. 14).

When the Commission considers it necessary to draw on this reserve, it convenes a three-way meeting as soon as possible in order to obtain the agreement of the two arms of the budgetary authority on the need to use the reserve and on the amount required. The reserve is drawn on by means of a transfer to the budget headings concerned.

CHAPTER 81 — LOANS GRANTED BY THE COMMISSION

Article Item	Remarks
802	*(cont'd)* A summary of borrowing and lending operations and debt management, in capital and interest, is given in Annex II to Part B of Section III.
810	This article is intended to record capital repayments and interest payments on special loans and risk capital granted from the appropriations in Chapter B7-40 of the statement of expenditure of Section III 'Commission' to those countries in respect of which the Financial Protocols annexed to the Agreements make provision for the grant of such loans and risk capital by the Community. The revenue obtained normally exceeds the amounts forecast in the budget because of the interest payments on special loans and risk capital which may still be disbursed during the preceeding financial year as well as during the current financial year. The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments, and interest on risk capital generally in annual instalments.
811	The loans granted to migrant workers forming part of the appropriation under Item B3-4110 of the statement of expenditure of Section III 'Commission' yield interest and give rise to capital repayments.
812	The building loans granted to officials yield interest and give rise to capital repayments.
813	Council Regulation (EEC) No 319/92 of 3 February 1992 on the implementation for a trial period of the European Communities Investment Partners financial instrument for countries of Asia, Latin America and the Mediterranean region (OJ No L 35, 12. 2. 1992, p. 1). This article is intended to record capital repayments and interest payment on loans and risk capital granted from the appropriations in Article B7-500 of the statement of expenditure of Section III 'Commission' under the European Communities Investment Partners operation.
814	Council Regulation (EEC) No 3557/90 of 4 December 1990 on financial assistance for the countries most directly affected by the Gulf crisis (OJ No L 347, 12. 12. 1990, p. 1).

The interest on special loans and risk capital is charged from the moment the loans are disbursed; interest on special loans is paid in six-monthly instalments and interest on risk capital generally in annual instalments.

CHAPTER A-3 0 — COMMUNITY SUBSIDIES

Article Item	Remarks
	The appropriations entered against this chapter are intended to cover subsidies to institutions, bodies, projects and non-governmental organizations advancing the idea of European integration. The Commission is asked to bring its rules on the granting of subsidies into line with the following principles by 15 March 1996: — measures to advance the idea of European integration, — balanced allocation of funding among all the Member States, — introduction of control measures on the basis of partnership between the Community institutions and the bodies involved, — drafting of a report to the budgetary authority, as part of the budgetary procedure, on all the funding allocated, including a precise description of the activities funded, — funding strictly earmarked to cover operating expenditure to the exclusion of all administrative expenditure, except expenditure on short-term measures, — establishment of a minimum threshold to guarantee the effectiveness of the subsidy and measures to encourage the establishment of networks of bodies.
A-3 0 0	Treaty establishing the European Atomic Energy Community, and in particular Articles 52 to 54 thereof. Statutes of the Euratom Supply Agency, and in particular Article VI thereof. At its 23rd session on 1 and 2 February 1960, the Euratom Council proposed unanimously that the Commission postpone not only the levying of the charge (intended to cover the operating expenditure of the Euratom Supply Agency) but also the actual introduction of the said charge. Since then a subsidy has been included in the Commission's budget to balance the revenue side against the Agency expenditure figures shown in the statement of estimates.

Article Item	Remarks

General observations

(a) **Revenue from the common agricultural policy**

The common policy on markets gives rise to revenue which constitutes Community own resources, i.e.:

— agricultural levies	777 600
— sugar and isoglucose levies	1 185 750
Total	1 963 350 (1)

(b) **Specific concessions**

Both specific concessions granted by the Community to some non-member countries and blanket trade concessions have budgetary consequences which must be shown.

The approximate cost to the European Agricultural Guidance and Guarantee Fund, Guarantee Section, of some of those concessions is indicated below together with factors likely to bring about a reduction in budget expenditure.

Cereals

Reduced-rate or zero-duty imports of 17 000 000 tonnes (cereals equivalent) of cereal substitutes (in particular manioc and corn gluten feed), of 2 000 000 tonnes of maize and 300 000 tonnes of sorghum into Spain (these amounts will be reduced by 700 000 tonnes imported into Spain from non-member countries as cereal substitutes) and of 500 000 tonnes of maize into Portugal give rise to refund expenditure for this sector in surplus of some ECU 945 000 000 for 1996 (included in Article B1-1 0 0).

(1) Taking account of the 10 % deduction to cover the Member States' collection costs.

COMMISSION

Subsection B1
(EAGGF Guarantee Section)

Article Item	Remarks
	It should be pointed out that the reduced-rate or zero duties on imports of these products are a result of the GATT negotiations. The Community accepted them as a concession in exchange for the unbinding of cereal import charges. This in turn enables the Community to support the cereals sector at a lower cost to the budget than would otherwise be the case. *Sugar* Each year the Community imports around 1 300 000 tonnes pursuant to the Protocol on sugar annexed to the ACP-EEC Convention and the specific agreement with India with another 280 000 tonnes imported into Portugal at a reduced rate of levy. As its own sugar production exceeds its requirements, it has to export an equivalent quantity. The cost in export refunds (included in Article B1-1 1 0) can be put at ECU 785 000 000 for 1996. *Olive oil* Under the agreement between the Community and Tunisia, a total of 46 000 tonnes of olive oil must be imported from Tunisia at reduced duties. The cost of exporting an equivalent quantity may be estimated at ECU 23 000 000 for 1996 (included in Article B1-1 2 0), the net cost being ECU 19 000 000 taking account of duties levied. *Butter* Current access for New Zealand butter totals 76 666 tonnes. The cost of exporting an equivalent quantity is put at ECU 139 000 000 (included in Article B1-2 0 0), with a net cost of ECU 71 000 000 taking account of duties levied. *Beef / veal* Reduced-rate or zero-duty meat imports amount to around 530 000 tonnes. Being self-sufficient, the Community will have to export an equivalent quantity. The cost for 1996 can be estimated at ECU 907 000 000 (included in Article B1-2 1 0), with a net cost of ECU 809 000 000 taking account of duties levied. *Pigmeat* Reduced-rate or zero-duty imports amount to around 96 000 tonnes. An equivalent quantity must be exported at an estimated cost of ECU 18 000 000 (included in Article B1-2 3 0). The net cost is ECU 1 000 000 taking account of duties levied. *Eggs* Reduced-rate or zero-duty imports amount to 161 000 tonnes. The Community must export an equivalent amount, the cost of which for 1996 can be estimated at ECU 30 000 000 (included in Article B1-2 4 0). Net income from duties amounts to ECU 2 000 000 in view of the fact that revenue exceeds the cost of export. *Poultrymeat* Reduced-rate or zero-duty imports amount to around 109 000 tonnes. The Community must export an equivalent quantity, the cost of which for 1996 can be estimated at ECU 30 000 000 (included in Article B1-2 4 1). The net cost is ECU 16 000 000 taking account of duties levied.

Consequently, appropriations for the Structural Funds cannot be implemented unless the measures financed by these Funds comply with the provisions of the Treaties and the acts adopted pursuant thereto, in particular those concerning environmental protection, as stipulated in Article 7 of Regulation (EEC) No 2052/88. They should be accompanied by an environmental impact commentary according to the principles of the Commission's letter of understanding of 8 December 1995. The Commission will compare, in its quarterly reports on the implementation of the budget and in the administrative accounts for the financial year 1994, the utilization of appropriations, by Member State and monitoring measure, with the above forecasts.

This appropriation is intended to cover expenditure on controls which the Commission will carry out on EAGGF expenditure using all means likely to avoid undue payment and, in particular, by means of on-the-spot checks, such as expenditure on the technical improvement of such controls (electronic data transmission, remote sensing, etc.).

It also covers Commission enquiries and checks in the Member States so as to verify that Community rules are being applied correctly in order to ensure a uniform and correct application of agricultural regulations and in particular those involving Community financing (e.g. the grading of carcases, the water content of chicken carcases, surveys of vineyard areas, etc.).

A further ECU 2 500 000 is earmarked to cover expenditure on the monitoring of animal protection provisions during the transport of animals for slaughter inside and outside the European Union.

This article also covers the verification of expenditure of the European Agricultural Guidance and Guarantee Fund, Guidance Section, by all means likely to prevent any undue payment.

Fifth periodic report on the social and economic situation in the Community (COM(94) 322 final). This appropriation is intended to finance pilot projects for the benefit of the long-term unemployed. The Commission must finance initiatives to assess the actual impact of the measures which might be developed on a large scale. The scheme will target the long-term unemployed of over 40 years of age, who have been out of work for more than two years. It will include in particular: — training measures for jobs in the public utility sectors (government departments, hospitals, etc.), — training measures for jobs in specialized sectors, including services. It should also help to reduce regional disparities in employment. A six-monthly report will be submitted to the budgetary authority. CHAPTER B2-6 1 — PERIPHERAL REGIONS AND DESTABILIZED ACTIVITIES

Article Item	Remarks
B2-6 1 0	The extraordinary events of 1990 had adverse effects, particularly on peripheral regions and destabilized activities. Such events were the entry into the Community of the *Länder* of the former German Democratic Republic, the new trade concessions to recipient countries under the Phare programme, the conversion of military installations under the agreements on disarmament and the new energy crisis. One-off measures were deemed necessary to assist the regions and activities concerned to overcome these unexpected but temporary handicaps. The payment appropriation under this article is intended to settle ECU 90 000 000 committed for this measure in 1991 and 1992. Commitment appropriation authorized for 1996: —. These break down in the main as follows: — encouragement for measures to develop European cultural heritage (buildings, monuments and artefacts, archaeology, museums and collections, archives, underwater heritage, etc.) through specific projects organized into four main headings: — action in connection with 'major' or 'exceptional' heritage, including measures under way (Acropolis, Mount Athos, Chiado, Coimbra, Santiago de Compostela, Burgos Cathedral), — support for European heritage workshops (former pilot projects) on common themes developed at national, local or regional level, but possibly also covering heritage relating to buildings, monuments and artefacts, — development of standards/methods concerning conservation practices developed by international professional organizations (e.g. documentation on cultural assets, loans of works, conservation, etc.), — culture-centred projects and studies complementing other Community activities, — support for networks and partnerships in order to strengthen transnational cooperation and to promote exchanges and pooling of experience between professionals, institutes, museums and other heritage institutions,

This appropriation will make it possible to work towards the following aims, as laid down in Decisions 90/685/EEC, 95/563/EC and 95/564/EC:

— to help create a favourable environment within which Community undertakings will act as a driving force alongside those from other European countries,

— to stimulate and increase the competitive supply capacity of European audiovisual products, with special regard for the role and requirements of small and medium-sized undertakings, the legitimate interests of all professionals who play a part in the original creation of such products and the position of countries in Europe with smaller audiovisual production capacities and/or with a limited geographical and linguistic area,

— to step up intra-European exchanges of films and audiovisual programmes and to make maximum use of the various means of distribution which either exist or are still to be set up in Europe, with a view to securing a better return on investment, wider dissemination and greater public impact,

— to encourage networking among European professionals and enterprises in the audiovisual industry,

— to increase European production and distribution companies' share of world markets,

— to promote access to and use of the new communications technology, particularly European technology, in the production and distribution of audiovisual material,

— to encourage an overall approach to the audiovisual industry which allows for the interdependence of its various sectors,

— to undertake the necessary consultations with all the circles concerned.

This appropriation also covers all expenditure on technical assistance structures that will help the Commission in the management and coordination of the programme up to a maximum of ECU 3 000 000.

INFORMATION AND COMMUNICATION

CHAPTER B3-3 0 — INFORMATION AND COMMUNICATION

Article Item	Remarks
B3-3 0 0	*Former Articles B3-3 0 0 and B3-3 0 3* Treaty establishing the European Community, and in particular Articles 126 and 127 thereof. European Parliament resolution of 14 June 1991 on Community policies and their impact on young people (OJ No C 183, 15. 7. 1991, p. 469). Resolution of the Council and Ministers meeting within the Council of 26 June 1991 on priority actions in the youth field (OJ No C 208, 9. 8. 1991, p. 1). Conclusions of the Council and of the Ministers for Youth meeting within the Council of 11 April 1992 on the priority of an information programme for young people. European Parliament resolution of 17 September 1993 on the information policy of the European Community (OJ No C 268, 4. 10. 1993, p. 192). This appropriation is intended to cover the funding of general information and communication measures concerning the European Union implemented jointly by the European institutions and designed to provide European citizens with information about Europe. These measures will be aimed at public opinion in general, opinion-leaders and specific target groups (including women and young people) in order to foster a better understanding of the objectives and reality of European integration and the methods used to achieve it, in a context of dialogue between the institutions and citizens. With regard to the management of these appropriations, the Commission is assisted by an advisory working party comprising representatives of Parliament and the Commission, hereinafter referred to as the 'Working Party on Information Measures', chaired by the Commission, which may subsequently be enlarged to include the other institutions. The Commission submits to the working party for its opinion the annual programme and the specific projects, accompanied by a list of recipients of the amounts earmarked for each measure. Once they have been submitted to the working party, the measures are managed under an interinstitutional cooperation procedure by the Commission and the institutions, either individually or jointly. The programme of measures under this interinstitutional cooperation procedure and an assessment of the projects implemented must be submitted to the budgetary authority before 30 June 1996. Qualitative opinion surveys should be carried out and an information strategy developed to determine the extent of knowledge of opinion-leaders. This multi-faceted action depends for its effectiveness on opinion polling and impact assessments. It includes operations which can be either multinational or centralized such as visits, publications, audiovisual productions, documentary and computerized information activities and Europe-wide operations directed at specific target audiences such as young people or women, decentralized operations to meet the specific needs of given countries or regions and representational duties in political circles. It also covers the cost of preparing, drafting and translating the different language versions using all appropriate means, including computerized methods. Part of the appropriation is earmarked for the Women's Information Service, which is responsible for disseminating information to opinion-leaders (university services, women's associations) about the Community policy on equality of opportunity (Cahiers et Lettre de Femmes d'Europe, Niki Prize and Femmes d'Europe). This appropriation also covers the funding of a special information programme for the young people of the Community covering several areas of life and of Community policies, in the form of a database, updated permanently and available throughout the European Union. Also charged to this article is Commission expenditure on an all-round drive in the area of communication, through campaigns, public relations activities and participation in events for the general public associated with Community events. These operations are designed to develop the legal and political concept of European citizenship. With regard to the management of these appropriations, the Commission is assisted by an advisory working party comprising representatives of Parliament and the Commission, hereinafter referred to as the 'Working Party on Information Measures', chaired by the Commission, which may subsequently be enlarged to include the other institutions.

The Commission submits to the working party for its opinion the annual programme and the specific projects, accompanied by a list of recipients of the amounts earmarked for each measure.

Once they have been submitted to the working party, the measures are administered, under an interinstitutional cooperation procedure, by the Commission and the other institutions, either individually or jointly.

The programme of measures under this interinstitutional cooperation procedure and an assessment of the projects carried out must be submitted to the budgetary authority before 30 June 1996.

This appropriation is intended to cover:

— the exchange of job vacancies and applications at Community level and across borders,

— the exchange of information between Member States concerning labour market trends and living and working conditions.

This appropriation also covers the financing of the following measures in support of the Eures network:

— basic and continuing training of 'Euro-advisers',

— promotion of Eures among firms and the general public,

— development of two computer databases ('job vacancies and applications' and 'living and working conditions'),

— development of special structures for cooperation and services in border areas, pursuant to Article 17 (b) of Regulation (EEC) No 1612/68, as amended by Regulation (EEC) No 2434/92 (an amount of at least ECU 5 000 000 is earmarked for the financing of these cross-border structures in 1996).

White Paper submitted by the Commission on 27 July 1994 'European Social Policy — A way forward for the Union' (COM(94) 333 final) and in particular Part III, points 17, 18 and 19.

Proposal for Council Decision, submitted by the Commission on 25 July 1995, adopting a programme of non-legislative measures to improve health and safety at work (OJ No C 262, 7. 10. 1995, p. 18).

This appropriation is intended to cover the subsidy paid to the International Information Centre of the International Labour Office.

It also covers the cost of information and public awareness campaigns and training measures for health workers.

The growth in external cooperation work is the result of the agreement between the Community and the members of the European Free Trade Association, new developments in central and eastern Europe, the increasing general interest in health and safety and the need to step up cooperation with international organizations such as the International Labour Organization, the Organization for Economic Cooperation and Development, the World Health Organization and the International Maritime Organization.

This operation is designed to guarantee proper application of the Community directives on safety and health protection at the workplace, to continue promoting the establishment of strict standards for safety and health protection at the workplace in the Community, and to secure effective participation of the two sides of industry in planning, formulating and implementing the Community policy initiated by the Commission for the safety and health protection of workers.

The item also finances the implementation of pilot projects concerned with work and involving research, distribution of information, training and the organization of seminars concerning the place of work. Expenditure will primarily benefit smaller businesses and will concern Community legislation on the protection of health, security and the environment in order to make people aware of the working environment and the environmental risks existing at the work place.

This appropriation also covers pilot projects on environmental training for workers in smaller businesses.

Also entered against this item is expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

The commitment appropriation authorized for 1996 is ECU 4 500 000.

The likely schedule of payments *vis-à-vis* commitments is as follows:

B4-1000	Treaty establishing the European Community, and in particular Articles 130 (1) fourth indent, 130r, 130s (1) and (235) thereof. Council resolution of 16 September 1986 concerning new Community energy policy objectives for 1995 and convergence of the policies of the Member States (OJ No C 241, 25. 9. 1986, p. 1). Resolution of the Council and of the representatives of the Governments of the Member States meeting within the Council of 1 February 1993 on a Community programme of policy and action in relation to the environment and sustainable development (OJ No C 138, 17. 5. 1993, p. 1). Proposal for a Council Regulation (EC), submitted by the Commission on 15 April 1994, concerning a Community programme providing financial support for the promotion of European energy technology 1995 to 1998 ('Thermie II') (OJ No C 158, 9. 6. 1994, p. 6). Council resolution of 23 November 1995 on the Green Paper 'For a european Union Energy Policy' (OJ No C 327, 7. 12. 1995, p. 3). The aim of the Thermie II programme is not only to contribute to the achievement of the energy objectives, but also to implement other major Community priorities: completion of the internal market, improvement of the competitiveness of European industry, improvement of living conditions in rural and urban regions, strengthening of economic and social cohesion and cooperation with third countries. This programme provides for the promotion of energy technologies in Europe by demonstrating their economic viability, promotion of the results of similar projects financed through Member States' programmes or by industry, and assistance for the penetration of markets in third countries through industrial cooperation (all these activities form part of the current Thermie II programme (1995 to 1998) but not of the fourth RTD framework programme). The programme concerns the rational use of energy, renewable energy sources and fossil fuels, and ensures the promotion of technology by means of demonstration and dissemination measures geared to a particular end use in industry, the energy industry, the tertiary sector and rural energy systems. This appropriation is intended to cover the funding of: — up to 35 % of the eligible cost of demonstration projects, — measures to promote energy technologies including the dissemination of the results of demonstration projects, — transfer of energy technologies and industrial cooperation with third countries, — general support measures, including the assessment of projects and the programme. It also covers expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

Also included are projects to derive energy from manure fermentation on agricultural holdings which, with either informal or formal cooperation, help solve environmental problems caused by over-fertilizing (Regulation (EEC) No 3640/85),

— measures carried out in the form of preparatory studies or evaluations on the containers in which waste is transported, the probable consequences of a criticality accident during the storage or transportation of radioactive waste and the problem of the contamination of waste packaging, and the approximation of national laws and practices relating to the transport of radioactive materials,

— measures aimed at reducing the growth in energy demand by using energy more efficiently, thus helping to achieve the energy policy objective set by the Council on 16 September 1986 and to solve environmental protection problems,

— three types of specific measures to improve energy efficiency (the SAVE I programme (specific actions for vigorous energy efficiency)) in all sectors where use of energy can be rationalized: regulations and administrative provisions, measures to support Member States and measures to improve information networks. These measures are not designed to assist the development and wider use of new technology,

— promotion of energy planning in regions and towns and cities in the Community.

It also covers expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

Council Decision 93/500/EEC of 13 September 1993 concerning the promotion of renewable energy sources in the Community (Altener programme) (OJ No L 235, 18. 9. 1993, p. 41).

The Altener programme (Alternative energy) is in three parts: regulations and administrative provisions designed to remove barriers to the marketing of renewable energy sources, specific back-up projects to improve the competitiveness of renewable energy sources and establishment of a proper information network to improve exchanges of information.

This appropriation is intended to cover support for these three types of measures for all renewable energy sources, and particularly solar energy, wind energy, geothermal energy, hydroelectric energy, energy from biomass and energy from waste. Those measures provide for subsidies for biofuel production only if the energy and ecological balance-sheet of the form of production concerned is very good, given that, in particular, intensive cropping reduces biodiversity.

It also covers:

— the costs of contributing to measures to improve the competitiveness of renewable energy sources (training, testing centres and centres of excellence, pilot schemes, standardization, etc.) which will be stepped up,

— the costs of creating coordinated tools to improve the flow of information,

CHAPTER B4-30 — ACTION ON THE ENVIRONMENT *(cont'd)*

Article Item	Remarks
B4-304	*(cont'd)* The purpose of these measures is: — to continue the measures already started under the air quality Directives. These consist primarily of monitoring and implementing Directives, exchanges of information on air pollution levels, intercomparison programmes and intercalibration exercises between the national measurement networks and laboratories and improvements to measurement methods. They must also pave the way for the drafting of new directives in this area and for associated measures: optimization of the monitoring networks and closer identification of the links between air pollution and health or damage to vegetation and/or buildings. They should also continue the measures started under the EMEP programme run by the Economic Commission for Europe in Geneva, — to reduce pollution problems in the European Union by developing legislation on fuel quality, emissions from mobile sources, aircraft, mobile off-road machinery and the control of evaporation losses during petrol storage, distribution and sales, — to develop Community criteria on background noise levels and specific legislation on noise from aircraft, construction plant and other machinery, — to continue the measures to help implement the strategy of sustainable mobility set out in the Community programme of policy and action in relation to the environment and sustainable development, and in the Council conclusions of 16 December 1994 on environment and transport. *Preparation, implementation and monitoring of Community law* This measure is intended to accelerate the introduction and implementation of certain Community regulations. *Economy and environment: Economic analysis* White Paper, presented by the Commission on 5 December 1993, 'Growth, competitiveness, employment — The challenges and ways forward into the 21st century' (COM(93) 700 final). The aim of this measure is to define, develop and implement an integrated policy aimed at sustainable development. In particular the measures involved, applied individually or in combination, should ensure that environmental protection objectives are applied effectively and economically. They cover: — the development of applications of the 'polluter pays' principle and analysis of the economic impact of civil liability, — the use of economic and fiscal instruments to promote the integration of environmental protection, — the analysis and application of the rules on State aid as regards the environment, — the examination and development of voluntary tools and 'self-regulatory' tools in order to promote environmental protection in the private sector, — the preparation of methods and guidelines to be applied to the cost-benefit analysis of policies and actions with an environmental impact, — the preparation of sustainable development indicators in key fields (energy, water, raw materials, waste and urban development), — examination of the environmental implications of international trade. *Economy and environment: Statistics* The objectives of this measure are, in the field of environmental indicators and satellite accounts for the environment: — the development of methodologies, — pilot studies in the Member States selected to test certain elements of these methodologies, — the publication of approved and harmonized methodologies, incorporated, where necessary, into legal instruments, — the collection of additional basic data necessary for the incorporation of environmental concerns into statistics on the main sectors of economic activity (energy, industry, agriculture, forestry, fisheries, transport, etc.), — regular production of indicators and satellite accounts, — dissemination of results and information on the methodologies used. *Ecological products, environmental audits and voluntary agreements with industry* The purpose of this measure is to promote the design, production, marketing and use of products which have a lower environmental impact throughout their life-cycle and to improve consumer information on the environmental impact of products.

It also concerns the operation of the Eco-label Forum, the purpose of which is to represent interest groups at Community level (industry, trade, consumers and environmental protection organizations) and to deliver detailed opinions on the definition of categories of products and their specific ecological criteria.

It also aims at implementing a Community eco-management and audit scheme, notably by developing criteria, standards and procedures for environmental management and audits and for environmental verifiers, by raising public awareness and by promoting dialogue between the authorities, industry and other private sector operators (finance, insurance and environmental organizations) and pilot projects and schemes to promote environmental audit standards, particularly amongst small and medium-sized businesses.

In addition, it covers the development or finalization of voluntary approaches to environmental matters.

Education, basic and advanced training

The purpose of this measure is to develop education and training as an instrument for achieving environmental protection objectives.

It concerns in particular: — projects relating to the implementation of Directives laying down basic standards and updating such standards in the light of new scientific knowledge (Articles 30 to 33 of the Treaty), — Community-wide consultation on plans for radioactive waste disposal (Article 37), — monitoring levels of background radioactivity and other tasks (Articles 35 and 36), — training and information activities. ECU 1 150 000 assigned to radiation protection is intended to cover radiation protection activities in the vicinity of nuclear power stations, activities connected with their decommissioning, radiation protection for the public in connection with the disposal of radioactive wastes and Community activities relating to personal, collective and environmental dosimetry. It also covers activities designed to protect the public against radiation from consumer goods containing radioactive substances and from radiopharmaceuticals, irradiation for medical purposes and natural radiation. Also charged to this article are costs in connection with the radioactive contamination of foodstuffs and feedingstuffs and with the prompt exchange of information in the event of a radiological emergency. This appropriation also covers Community initiatives for cooperation on protection and assistance in the event of a nuclear accident, and cooperation with non-Community countries.

It also covers expenditure on measures to strengthen or develop the market in financial services, to promote cooperation, notably in tax matters, between European enterprises, to develop the coordination of legislation in the company law field and to facilitate the setting-up of European companies and European economic interest groupings. Expenditure under this article may also cover the external aspects of the Directives applicable in respect of financial institutions, the mutual recognition of financial instruments *vis-à-vis* third countries, international negotiations, assistance for third countries in establishing a market economy, and the implementation of Community and international provisions for preventing money laundering. These operations are also intended to cover improvement of payment systems in the internal market, in particular between Member States, notably those in which such systems are underdeveloped, and encouragement of use of the ecu in cross-border transactions; reduction in the cost of, and time needed for, such transactions, taking into account the size of the internal market, notably with a view to economic and monetary union; development of the technical aspects so as to establish one or more payment systems on the basis of the follow-up to be given to the Commission communications by participation in technological research projects and pilot schemes, the granting of seed capital, and assistance in developing infrastructures. Also charged to this article is expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

This appropriation is intended to cover expenditure on projects to evaluate the effects of completion of the internal market on cooperatives and to improve their access to Community programmes.

Support is provided for activities planned by the Cooperative Union Limited to mark and demonstrate the successes of this sector of the European Union's economy and to draw attention to the not insignificant contribution that these enterprises can make to job creation and economic development on the eve of the 21st century.

This appropriation also covers the cost of:

— research into the job-creation potential of cooperatives,

— information to encourage the setting-up of Euro-Info centres in the cooperative sector,

— training with a view to developing a European management structure for cooperatives.

The European Parliament calls on the Commission to draw up a report on developing these activities before the end of 1996.

Also charged to this article is expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (see Commission communication of 22 April 1992).

This appropriation is intended to cover interest-rate subsidies (two percentage points per year, for a maximum period of five years and a maximum principal of ECU 1 000 000 000) granted by the EIB to SMEs (including cooperatives) in line with the arrangements applicable to loans granted under the temporary mechanism adopted by the Edinburgh and Copenhagen European Councils. These subsidies are granted only for investment projects which create jobs.

ECU 50 000 000 is earmarked for funding the extension of the action plan to promote growth and employment as laid down in Decision 94/217/EC.

The commitment appropriation authorized for 1996 is ECU 57 750 000.

The likely schedule of payments *vis-à-vis* commitments is as follows:

Commitments		Payments				
		1995	1996	1997	1998	Subsequent years

Total	60 500 000	2 750 000	57 750 000			

B5-3 2 3 This appropriation is intended to afford small enterprises greater access to sources of loan finance, particularly where these loans are designed to finance investment in energy savings or in upgrading or complying with environmental standards. It will be used to cover all or part of the cost of obtaining loan guarantees, notably from the European Investment Fund (EIF). As the EIF works on a commercial basis and therefore charges a guarantee premium for its activities, the European Union budget will cover all or part of the cost of the premium. The benefit of this measure will be limited to small enterprises, preferably employing around fifty persons or less working full time, or the equivalent in the case of part-time work, and engaged in productive activities (craftworkers, small industry, catering industry, including the service sector). The action will take the form of an exploratory/pilot project and will be followed by an overall evaluation of its impact.

TRANS-EUROPEAN NETWORKS

CHAPTER B5-7 0 — TRANSPORT NETWORKS

Article Item	Remarks
B5-7 0 0	Treaty establishing the European Community, and in particular Articles 129b to 129d thereof. Council Decision 93/628/EEC of 29 October 1993 on the creation of a trans-European combined transport network (OJ No L 305, 10. 12. 1993, p. 1). Council Decision 93/629/EEC of 29 October 1993 on the creation of a trans-European road network (OJ No L 305, 10. 12. 1993, p. 11). Council Decision 93/630/EEC of 29 October 1993 on the creation of a trans-European inland waterway network (OJ No L 305, 10. 12. 1993, p. 39). Proposal for a Council Directive, submitted by the Commission on 15 April 1994, on the interoperability of the European high-speed train network (OJ No C 134, 17. 5. 1994, p. 6), as amended on 15 June 1995 (OJ No C 203, 8. 8. 1995, p. 13). Council Regulation (EC) No 2236/95 of 18 September 1995 laying down general rules for the granting of Community financial aid in the field of trans-European networks (OJ No L 228, 23. 9. 1995, p. 1). Common position (EC) No 22/95, adopted by the Council on 28 September 1995, with a view to adopting a European Parliament and Council Decision on the Community guidelines for the development of the trans-European transport network (OJ No C 331, 8. 12. 1995, p. 1). General objective of the measure: part-financing of infrastructure projects that contribute to meeting the objectives set out in Article 129b of the Treaty. The Community measure is intended to promote the interconnection and interoperability of national networks as well as access to these networks, taking into account the need to link island, landlocked and peripheral regions of the Community with its central regions. The establishment of a trans-European transport network is thus a contribution to the effective and harmonious operation of the internal market and to improving economic and social cohesion. To achieve these objectives, the Community is establishing guidelines (network plans) identifying projects of common interest, with each Member State approving the network plans and projects of common interest that concern its own territory. Community financial assistance will principally support the definition and launching of projects of common interest by promoting feasibility studies for such projects and/or, where appropriate, at the implementation stage by means of interest rate subsidies, contributions to the cost of loan guarantees, or a direct subsidy. This appropriation is intended to finance measures to encourage and facilitate public/private partnerships. The use of funding for the various modes of transport will be geared to a sustainable transport policy, encouraging those modes which are most environment-friendly and making the best possible use of existing infrastructures, in particular through intermodal and modal traffic management projects. Three-quarters of this appropriation is earmarked for financing the projects listed below. Any change to this list must be made by common accord between the two arms of the budgetary authority on a proposal from the Commission. Projects included in the list of priorities shall satisfy the following criteria: — the projects and their access routes shall be within the trans-European network, — the projects shall fill in missing links or create interconnection nodes, and they shall be assessed by reference to their share of international traffic, — it shall be possible for work to begin within the next five years, — the total cost of all projects shall not exceed the funds available,

European Parliament and Council Decision No 2717/95/EC of 9 November 1995 on a set of guidelines for the development of the EURO-ISDN (Integrated Services Digital Network) as a trans-European Network (OJ No L 282, 24. 11. 1995, p. 16). Other acts relating to telematics and telecommunications networks in the framework of the Council regulation laying down general rules for the granting of Community financial aid in the field of trans-European networks. This appropriation is intended to cover the establishment of trans-European networks in the telecommunications sector. In general terms, the different spheres where these measures will be implemented are listed in the White Paper on Growth, competitiveness and employment, and are: broadband networks (including the integrated services digital network (ISDN), general services (in particular electronic mail, database access and interactive video services) and applications of collective interest (teleworking, telemedicine, teletraining)). It will also be used to stimulate the creation of markets for trans-European services in the fields concerned, in particular through the interconnection of physical networks and the interoperability of services. It also covers CTRs (common technical regulations) conformity contracts and market surveys. There are three forms of intervention for projects of common interest: — grants for preparatory, feasibility and evaluation studies and technical support measures, — interest rate subsidies and/or loan guarantees, — direct grants for the implementation of projects, in duly justified cases. This appropriation also covers expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

CHAPTER B5-7 2 — TELECOMMUNICATIONS NETWORKS *(cont'd)*

Article Item	Remarks
B5-7 2 1	*(cont'd)* Proposal for a European Parliament and Council Decision, submitted by the Commission on 6 April 1995 adopting an action programme for Community customs (Customs 2000) (OJ No C 346, 23. 12. 1995, p. 4) amended on 6 October 1995 (OJ No C 327, 7. 12. 1995, p. 32). Council Decision 95/468/EC of 6 November 1995 on a Community contribution for telematic interchange of data between administrations in the Community (IDA) (OJ No L 269, 11. 11. 1995, p. 23). Numerous regulations, decisions and directives in force requiring trans-European data transmission networks between administrations, in particular regarding the operation of the internal market and the Community frontier-free area. This appropriation is intended to cover expenditure relating to the implementation of the IDA (interchange of data between administrations) measure and the Edicom (electronic data interchange for commerce) measure, the objective of which is to provide through the trans-European networks the support needed by administrations, including economic operators and regional and local authorities, for the interchange of the telematic information, data and documents necessary to the functioning of the Community and, in particular, the operation of the internal market. In general terms, without giving an exhaustive list, it covers expenditure relating to the creation of telematics networks between administrations in the following fields: — indirect taxation and customs, in order to ensure the smooth operation of the internal market by establishing a uniform external frontier (strategic programme for customs consisting of new working methods brought together under the generic title Customs 2000) and implementing policies and procedures at Community level which help detect and prevent fraud, in particular commercial and tax fraud, while at the same time covering customs aspects of drug trafficking and other threats to society, — the movement of toxic and hazardous waste, pollution monitoring and combating cross-border pollution, — statistics (Edicom), for the interconnection of national and Community statistical information systems (especially Intrastat) regarding the exchange of goods between Member States, with access also for business and industry, — plant health, using computerized information interchange systems between veterinary authorities with a view to more effective monitoring and the dissemination of available information on as wide a scale as possible, — management of Community quantitative limits on imports and exports, — improving the Community decision-making process, in order to render more efficient the management of decision-making procedures, including those involving cooperation and co-decision, — ensuring greater transparency in the allocation of public contracts, — and in other fields to improve the operation of the internal market and the frontier-free economic area in the interests of the free movement of goods, services, persons and capital, including the management of Community policies. Also charged to this article: — coordination of and assistance with network start-up, — joint training of users, — costs associated with development, effective implementation, operation, maintenance and improvement of operational systems of data interchange between the administrations responsible for the management of the internal market, i.e. the relevant Commission departments and Member State authorities, and between the Commission and the other institutions and, where appropriate, with economic operators. It will be used to finance preliminary feasibility studies, including validation exercises, to support the implementation (development, start-up and exploitation of the shared parts of the networks) of projects of common interest that will be established on the basis of a set of guidelines and to finance across-the-board support measures, such as the drafting of outline plans giving general guidelines for the creation of shared telematics architectures and demonstration platforms and for the initial phases of training programmes and information campaigns. This appropriation also covers expenditure on studies, meetings of experts, conferences and congresses, information services and publications directly related to the implementation of the objective of the measure of which they form an integral part, with the exception of expenditure on the management of these measures or on general administration (see Commission communication of 22 April 1992).

Article Item	Remarks
B5-7 2 2	*(cont'd)* Cooperation agreements with various non-member countries and regions of the world. Other measures relating to telematics and telecommunications networks. The Commission's White Paper on Growth, competitiveness and employment, the Bangemann report, the growing worldwide activity in the field of the 'information society', in particular the major studies launched by the OECD and the interest shown by the G7 countries, have considerably broadened the scope of the activities undertaken so far in the context of the trans-European information networks. The integration of this concept into the broader one of the 'information society', the globalization of the efforts undertaken to create this society — considered in particular as a means to remedy unemployment, notably at regional or local level — make it necessary to explore new perspectives and to stimulate new activities. This appropriation is intended to cover: — the analysis of the technical, economic and social aspects, and also the social challenges of implementing the information society, — the dissemination and promotion of measures relating to the information society to encourage users to express their needs and to stimulate the interest of industry in providing services and applications to meet these needs, — the analysis of the factors that facilitate the implementation of 'information highways', in particular the demand for new types of services and applications, for example through a permanent inventory of current measures for the implementation of applications, as well as of the transition from the present networks towards broadband networks, — the establishment of a forum for discussion on the development of the information society, and follow-up measures, — the identification and evaluation of the financing mechanisms needed to develop the information society, in particular the organization of public/private partnership for the realization of applications of public interest, — measures to raise awareness of the impact of the information society at regional level and the gathering of relevant data with a view to drawing up an action plan in the medium-term to boost the ability of regions to exploit the potential of the information society, — the preparation of action to be taken by the Community in international organizations and in negotiations with non-member countries on the development of the global information society. Support for dialogue on the information society with non-member countries, in particular developing countries, — the compilation, analysis and dissemination of information concerning measures to develop the information society: coordination of relevant activities outside the European Union and Information Society Forum. A proportion of this appropriation is for research into the impact of the information society on women.

Treaty establishing the European Community, and in particular Article 130 thereof.

Proposal for a Council Decision, submitted by the Commission on 30 June 1995, adopting a multiannual Community programme aiming to stimulate the development of a European multimedia content industry and to encourage the use of multimedia content in the emerging information society (Info 2000) (OJ No C 250, 26. 9. 1995, p. 14).

The Info 2000 programme has three strategic long-term objectives:

— to maximize the contribution of advanced information services to the professional, social and cultural development of European citizens.

These objectives are geared equally to fostering economic development and creating jobs and to preserving and promoting Europe's rich socio-cultural heritage, including its languages, within the new global information society.

This appropriation is intended to cover expenditure on contracts with a view to the implementation of the programme and the proposed projects, including shared-cost contracts, cooperation, evaluation, technical work, coordination, scholarships, subsidies, the training and mobility of scientists, participation in international agreements and contributions towards expenditure on equipment.

— the introduction of these services in the European Union by qualified staff,

— the establishment of the technical conditions required to raise the general level of confidence in computer products, information systems, services and applications.

CHAPTER B5-8 0 — COOPERATION IN THE FIELDS OF JUSTICE AND HOME AFFAIRS

Article Item	Remarks
B5-8 0 0	*Former Articles B5-8 0 0 to B5-8 0 2* Treaty on European Union, and in particular Title VI Article K.8 thereof. This article is to accommodate any expenditure on common action on cooperation in the fields of justice and home affairs provided for under Title VI of the Treaty, in particular in the following areas: 1. asylum policy; 2. rules governing the crossing by persons of the external borders of the Member States and the exercise of controls thereon; 3. immigration policy and policy regarding nationals of third countries: (a) conditions of entry and movement by nationals of third countries on the territory of Member States; (b) conditions of residence by nationals of third countries on the territory of Member States, including family reunion and access to employment; (c) combating unauthorized immigration, residence and work by nationals of third countries on the territory of Member States; 4. combating drug addiction in so far as this is not covered by 7 to 9; 5. combating fraud on an international scale in so far as this is not covered by 7 to 9 and does not involve Community budget fraud, which is covered by Article 209a of the EC Treaty; 6. judicial cooperation in civil matters; 7. judicial cooperation in criminal matters; 8. customs cooperation; 9. police cooperation for the purposes of preventing and combating terrorism, unlawful drug trafficking, trafficking in women and other serious forms of international crime, including if necessary certain aspects of customs cooperation, in connection with the organization of a Union-wide system for exchanging information within a European Police Office (Europol). If the Council adopts a decision under Article K.8 of the Treaty, the Commission will propose a transfer of appropriations from Chapter B0-4 0 to Article B5-8 0 0. This appropriation is intended to cover all outstanding payments in Title B5-8. It also covers: — a programme for law enforcement officers which contributes to the pooling of knowledge on their respective methods and definitions (e.g. comparison of definitions of offences) and techniques. The programme will also be geared to foster language knowledge, — a research programme geared to analysing barriers to cooperation between the Member States' law enforcement authorities. The opportunities afforded by the Leonardo da Vinci and Socrates programmes should be exploited by police training courses. Partly in view of the intergovernmental conference in 1996, the European Union must step up cooperation in the fields of justice and home affairs and provide the necessary financial resources, particularly for effective measures to combat organized crime and for an increase in cooperation among police forces and customs services, including maritime cooperation.

JOINT RESEARCH CENTRE — STAFF AND RESOURCES

CHAPTER B6-1 1 — STAFF

Article Item	Remarks
	The appropriations in this subsection cover not only expenditure on operations and staff covered by the Staff Regulations, but also other expenditure on staff, contracting, infrastructure, information and publications and any other administrative expenditure arising from research and technological development operations, including exploratory research. Revenue available for re-use in Titles B6-1 to B6-4 in accordance with Article 27 of the Financial Regulation of 21 December 1977 applicable to the general budget of the European Communities (OJ No L 356, 31. 12. 1977, p. 1), as last amended by Regulation (EC, Euratom, ECSC) No 2335/95 (OJ No L 240, 7. 10. 1995, p. 12), is estimated at ECU 4 600 000; various revenue may be used to provide additional appropriations to be used as earmarked in Titles B6-1, B6-2, B6-3 or B6-4.
B6-1 1 1	Treaty establishing the European Community, and in particular Article 130i thereof. Treaty establishing the European Atomic Energy Community, and in particular Articles 7 and 8 thereof. Council Decision 94/268/Euratom of 26 April 1994 concerning a framework programme of Community activities in the field of research and training for the European Atomic Energy Community (1994 to 1998) (OJ No L 115, 6. 5. 1994, p. 31). Decision No 1110/94/EC of the European Parliament and of the Council of 26 April 1994 concerning the fourth framework programme of the European Community activities in the field of research and technological development and demonstration (1994 to 1998) (OJ No L 126, 18. 5. 1994, p. 1). Council Decision 94/918/EC of 15 December 1994 adopting a specific programme for research and technological development, including demonstration, to be carried out for the European Community by the JRC and by means of activities within the framework of a competitive approach and intended for scientific and technical support to Community policies (1995 to 1998) (OJ No L 361, 31. 12. 1994, p. 114). Council Decision 94/919/Euratom of 15 December 1994 adopting a specific programme of research and technological development, including demonstration, to be implemented by the Joint Research Centre for the European Atomic Energy Community (1995 to 1998) (OJ No L 361, 31. 12. 1994, p. 132). Council Decisions concerning the specific programmes implementing the fourth European Community framework programme for Community research, technological development and demonstration activities (1994 to 1998). This appropriation covers expenditure relating to the staff complement of the Joint Research Centre, for the execution of tasks entrused to it, and in particular: — direct action, consisting of research programmes, exploratory research activities and scientific and technical support activities of an institutional nature undertaken in the establishments of the Joint Research Centre, — indirect action, consisting of programmes implemented as part of the Joint Research Centre's activities conducted on a competitive basis. In view of the fact that there is a shortfall in the actual staff complement (due to the way in which research centres operate), this appropriation will also cover expenditure relating to visiting scientists, fellows and seconded staff. The revenue received for staff employed on work carried out by the Joint Research Centre for outside bodies will be used to provide additional appropriations (Items 6 2 2 3 and 6 2 2 1 respectively of the statement of revenue). The appropriations may be increased by JRC participation on a competitive basis in (indirect) shared-cost activities and in scientific and technical support for Community policies.

INDIRECT ACTION (SHARED-COST PROJECTS) AND CONCERTED ACTION — COMPLETION OF EARLIER PROJECTS AND OTHER ACTIVITIES

CHAPTER B6-5 1 — COMPLETION OF THE SECOND FRAMEWORK PROGRAMME (1987 TO 1991)

Article Item	Remarks
	These remarks apply to all the budget headings in Title B6-5. The appropriations entered in the articles or items of this title are essentially intended to cover expenditure on contracts for the implementation of the programmes in question, in particular research contracts, contracts of association, study contracts, contracts for integrated projects, evaluations of specific programmes, coordination and cooperation, and contracts covering grants, subsidies, the training and mobility of scientists, participation in international agreements, and the provision of facilities and equipment. These appropriations also cover expenditure on staff whether covered by the Staff Regulation or not, studies, meetings of experts, congresses, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure and operations linked with the achievement of the objective of the measure of which they form an integral part. The illustrative breakdown of appropriations by type of expenditure is derived from the table of equivalence set out in Annex I to this part of the statement of expenditure in this section (booking codes 1 to 6). The possibility of third countries or organizations from third countries taking part in European cooperation in the field of scientific and technical research (in particular COST) is envisaged in the case of some of these projects. Any financial contribution will be entered in Article 6 0 2 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 96 (1) of the Financial Regulation of 21 December 1977 applicable to the general budget of the European Communities (OJ No L 356, 31. 12. 1977, p. 1), as last amended by Regulation (EC, Euratom, ECSC) No 2335/95 (OJ No L 240, 7. 10. 1995, p. 12). Any revenue from third parties sharing the cost of projects with the Community (firms in European Free Trade Association Member States, industrial consortia, etc.) entered in Article 6 0 4 of the statement of revenue may lead to additional appropriations being made available in accordance with Article 96 (1) of the Financial Regulation. Additional appropriations will be made available under Article B6-5 4 1. Any revenue from charges for participation in seminars, conferences, etc., held by the Commission will be available for reuse in accordance with Article 27 (2) (g) of the Financial Regulation.

TITLE B6-7

INDIRECT ACTION (SHARED-COST PROJECTS), CONCERTED ACTION AND SUPPLEMENTARY PROGRAMMES — EC FRAMEWORK PROGRAMME (1994 TO 1998)

Article Item	Remarks
	These remarks apply to all the budget headings in Title B6-7. Treaty establishing the European Community, and in particular Article 130i thereof. Commission communication to the Council and the European Parliament of 12 May 1993 'Cohesion and RTD policy — synergies between research and technological development policy and economic and social cohesion policy' (COM(93) 203 final). Decision No 1110/94/EC of the European Parliament and of the Council of 26 April 1994 concerning the fourth framework programme of the European Community activities in the field of research and technological development and demonstration (1994 to 1998) (OJ No L 126, 18. 5. 1994, p. 1). The appropriations entered in the articles or items of this title are essentially intended to cover expenditure on contracts for the implementation of the programmes in question, in particular research contracts, contracts of association, study contracts, contracts for integrated projects, monitoring and evaluations of projects under the specific programmes and the framework programme, coordination and cooperation, and contracts covering grants, subsidies, the training and mobility of scientists, participation in international agreements, and the provision of facilities and equipment. They also cover expenditure on staff whether covered by the Staff Regulations or not, studies, meetings of experts, conferences, congresses, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure and operations linked with the achievement of the objective of the measure of which they form an integral part, including the action and measures necessary for preparation and monitoring of the Community's RTD strategy. Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest and the funding of high-level scientific and technological analyses and evaluations carried out to investigate new areas of research suitable for Community action. These appropriations also cover the costs of the general measures to increase the synergies between the action taken under the Structural Funds and the RTD activities, as indicated in the Commission communication of 12 May 1993 (COM(93) 203 final). These measures include promotion and implementation of the RTD programmes in the operational programmes under the Structural Funds in the Objective 1 regions (1994 to 1999); the provision of scientific and technological expertise to bolster the research and technological capacity of the less-favoured regions (Stride/SME initiative); assistance for specific sectors, such as rural development and small businesses, in defining scientific and technological guidelines; the development of new methods to strengthen transnational partnerships and, finally, examination of the measures to be taken, with the aid of studies, workshops and seminars. Also entered against these articles and items are the costs of the action taken by the Commission to take account of the experience gained in third countries with support for RTD capacity in the less-favoured regions on their territory with a view to global comparisons. These appropriations also cover the costs of the action taken by the Commission to promote coordination of the research and technological development activities in order to keep the national policies and Community policy consistent with a view to ensuring a tangible follow-up to the Council conclusions of 9 June 1995 on 'coordination of RTD policies' (7835/95 Presse 170G). These actions will concern the concertation between the Member States and the national and European scientific bodies on the general and sectoral policies and measures taken at national level. The objective will be to obtain relevant comparable information with a view to gradual harmonization of the measures taken by the Member States to create favourable conditions for the development of scientific and technological research in the European Union. The financial arrangements and the rules governing participation in the various programmes are set out in Annex III to the decisions on the specific programmes. The illustrative breakdown of appropriations by type of expenditure is derived from the table of equivalence set out in Annex I to this part of the statement of expenditure in this section (booking codes 1 to 6).

Article Item	Remarks
	The possibility of third countries or organizations in third countries taking part in European cooperation in the field of scientific and technical research (in particular COST) is envisaged in the case of some of these projects. Any financial contribution will be entered in Article 6 0 2 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 96 (1) of the Financial Regulation of 21 December 1977 applicable to the general budget of the European Communities (OJ No L 356, 31. 12. 1977, p. 1), as last amended by Regulation (EC, Euratom, ECSC) No 2335/95 (OJ No L 240, 7. 10. 1995, p. 12). Any revenue from third parties sharing the cost of projects with the Community (firms in European Free Trade Association Member States, industrial consortia, etc.) entered in Article 6 0 4 of the statement of revenue may lead to additional appropriations being made available in accordance with Article 96 (1) of the Financial Regulation. The amounts, given here for information, accruing from contributions from the EFTA States, entered against Article 6 3 0 of the statement of revenue and constituting 'allocated revenue' in accordance with the third indent of Article 4 (2) of the Financial Regulation give rise to the opening of corresponding appropriations and to implementation under Annex III to Part B, which forms an integral part of the general budget. Additional appropriations will be made available under Article B6-5 4 1. Any revenue from charges for participation in seminars, conferences, etc., held by the Commission will be available for reuse in accordance with Article 27 (2) (g) of the Financial Regulation.

B6-7 1 1 1	Council Decision 94/801/EC of 23 November 1994 adopting a specific programme for research and technological development, including demonstration, in the field of telematics applications of common interest (1994 to 1998) (OJ No L 334, 22. 12. 1994, p. 1). The aim of this specific programme is to develop applications for information and communication technologies with emphasis on interoperability throughout the European Union. It will contribute to satisfying the basic needs of modern society in areas of common interest (health, education and training, transport, access to information, etc.); meeting the requirements of Community policies; preparing European industry for the new markets which this research will open up; fuelling growth and employment by developing new systems and services for which there is demand; providing a return on the financial investments already made in programmes such as Esprit, RACE or their national equivalents. The term 'telematics applications' covers all the systems (hardware and software) and services (distance learning, remote medicine, remote management of road or air traffic, multilingual transactional processing, etc.) developed by this programme. This appropriation is intended to cover staff expenditure in respect of 152 staff (82 A, 23 B and 47 C).

The general objective of the programme is to develop advanced communication systems and services for economic development and social cohesion in Europe, taking account of the rapid evolution in technologies, the changing regulatory situation and opportunities for development of advanced trans-European networks and services.

The work will consolidate European technological leadership in digital broadband communications and enable effective network management and service deployment in a diverse and competitive communication environment. In particular, the work will stimulate and coordinate the emergence of digital multimedia services and integrated photonic systems with a view to their widespread introduction in Europe from the year 2000, including development of the technological basis for deployment of optical fibre networks.

It will ensure mobility on fixed networks and, through them, the introduction of advanced wireless, radio and satellite systems across Europe, with particular emphasis on user access in both public and private networks.

Eventually, methods to assure the integrity, confidentiality and availability of information and to demonstrate how the systems operate, will be installed.

This appropriation is intended to cover staff expenditure in respect of 116 staff (63 A, 14 B and 39 C).

The objective of this specific programme is to contribute to implementing Activity I.7 of the fourth framework programme of research, technological development and demonstration activities concerning 'Marine sciences and technologies'.

The MAST III programme extends, develops and refocuses the activities carried out under the first two MAST (Marine Science and Technology) programmes. For the period considered, it is a step in a longer-term strategy which will enable Europe to make a full contribution to the knowledge and management of the oceans.

It covers the following four areas of activity:

— marine sciences,
— strategic marine research,
— marine technology,
— supporting initiatives.

It will invite the participation of those groups capable of promoting a comprehensive approach to the mechanisms of life, through the integration of appropriate disciplines and complementary techniques of any origin, while considering at the same time the needs and expectations of user groups. It will help implement the concept of cell factories, in view of the possibility which is given to exploit cellular properties in a predictable, specific and sustainable manner in very diverse fields including the environment, agriculture, health and industry. It is viewed therefore as the underpinning programme providing key information and know-how from which new technological options might be conceived and tested in the framework of other specific sectoral programmes or under Eureka.

It covers the following areas:

— cell factories,

— genome analysis,

— plant and animal biotechnology,

— cell communication in neurosciences,

— immunology and transdisease vaccinology,

— structural biology,

— prenormative research, biodiversity and social acceptance,

— infrastructures,

— horizontal activities (demonstration activities; ethical, legal and social aspects; public perception; socio-economic impacts).

Accompanying measures are planned in support of the research and training activities (meetings, consultation of experts, studies, participation in conferences or fairs, dissemination activities, etc.).

B6-7 1 5 1	*(cont'd)* The programme covers research, technological development and demonstration activities in the following fields: — rational use of energy in buildings, industry, the energy industry (including the electricity and heat sectors), transport and urban infrastructure, — renewable energy sources, particularly solar, biomass, geothermal, small-scale hydroelectric, wind and other sources, — fossil fuels: — clean technologies for solid fossil fuels, — generic combustion, — hydrocarbons and new fuels in transport, — exploration and production of hydrocarbons, and activities in support of definition and implementation of energy RTD strategies and dissemination. The programme will be implemented by means of shared-cost activities, concerted action, specific measures, preparatory, accompanying and support measures and schemes for dissemination and utilization of the results, as provided for in Annex III to the Decision adopting the programme. The rate of European Union financial aid paid for the shared-cost activities will depend on the nature of the project, particularly the economic and technical risks, the field concerned and how close the activity is to the market. In absolute terms, the projects will be on a scale allowing substantial innovation and significant technological breakthroughs in the spirit of concentration of effort. Where appropriate, projects can be combined to ensure greater synergy of resources and results. Special consideration will also be given to integrated projects treating social, economic or purely technical problems with a multidisciplinary approach and/or concerning problems taking account of the chain from research to demonstration and deployment on the market. Integrated projects will be carried out in such fields as integrated applications of renewable energy sources, combustion and urban transport. These projects will be backed up by concerted action in specific fields where simple coordination at Community level of the efforts of the Member States and of the relevant industries would make them more effective. A special procedure for SMEs will be introduced to encourage them to participate in the programme (technology stimulation). This appropriation also covers expenditure in respect of 73 staff (37 A, 16 B and 20 C).

B6-7 2 1 1	Council Decision 94/807/EC of 23 November 1994 adopting a specific programme of research and technological development, including demonstration, in the field of cooperation with third countries and international organizations (1994 to 1998) (OJ No L 334, 22. 12. 1994, p. 109). Cooperation with other fora for European cooperation involves stimulation and coordination activities, in particular with Eureka, in the framework of COST and with European organizations. The exchange of information, coordination and stimulation of activities of mutual benefit are planned with regard to cooperation with non-European industrialized third countries. The programme resources may also be used for Community participation in the exploratory phase of a joint project, whereas the financing of a possible operational phase of the project would have to be covered by the programme concerned. Cooperation with the countries of central and eastern Europe, the new Independent States of the former Soviet Union and the developing countries in specific areas not covered by the programmes of Activities 1, 3 and 4 will normally take the form of shared-cost activities or concerted action. Cooperation may also be furthered with the aid of appropriate structures. This programme will be carried out in the form of indirect action, where the Community makes a financial contribution to RTD activities carried out by third parties or by JRC institutes in association with third parties: — shared-cost activities: — RTD projects carried out by undertakings, research centres and universities (Community funding will normally not exceed 50 % of the cost of the project, with progressively lower participation the nearer the project is to the market place. Those universities and other institutions which do not have analytical budget accountancy will be reimbursed on the basis of 100 % of the additional costs. The financial contribution for participants from the central and eastern European countries, the Independent States of the former Soviet Union and the developing countries may exceed 50 %), — concerted action consisting of the coordination of RTD projects already funded by public authorities or private bodies (the Community participation may cover up to 100 % of the costs of the concertation), — specific measures for this programme: — measures to provide tools for general use in research centres, universities and undertakings, — support for Community participation in the exploratory phase of a joint project (the financing of a possible operational phase of the project would have to be covered by the specific programme concerned. The European Union's contribution to the above measures may cover up to 100 % of the costs), — support to facilitate participation of legal entities from the countries of central and eastern Europe, the Independent States of the former Soviet Union and developing countries, in certain other specific programmes of the framework programme (such participation should, however, normally be financed by resources of the third country concerned or other Community instruments), — preparatory, accompanying and support measures, such as: — studies in support of this programme and in preparation for future activities, — support for exchanges of information, conferences, seminars, workshops or other scientific or technical meetings, including intersectoral or multidisciplinary coordination meetings, — use of external expertise, including access to scientific databases, — scientific publications, including the dissemination, promotion and utilization of the results (coordination with the activities conducted under the third activity); the factors liable to encourage use of results will be taken into account from the outset and throughout the duration of RTD projects, the partners in which will constitute a key network for diffusion and exploitation of results, — study and monitoring of the developments in the science and technology policies of the third countries, — analysis of possible socio-economic consequences of international RTD cooperation, which will also contribute to the programme on 'Targeted socio-economic research', — training activities related to research covered by this programme in order to stimulate technology transfer and enhance employment skills,

The aim of the programme is to help increase, through training, mobility and cooperation, the effectiveness of research and research infrastructures and to promote, through the stimulation of training and mobility of researchers, a quantitative and qualitative increase of human resources within the European Union and the associated States. The programme covers the following areas: — research networks (which will allow researchers from different countries to join their efforts within the framework of a joint research project), — access to large-scale facilities (to provide wider access for researchers to large European Union installations and, where necessary, to improve these installations to encourage more efficient use to be made of them), — training through research: — implementation of training through research and stimulation of researcher mobility in all the fields covered by the programme. Training periods may have a duration of between three months and three years and will allow European researchers to undergo training or specialization outside their country of origin. This activity also includes the mobility of experienced researchers towards the less-favoured regions of the European Union in order to bolster the RTD capacity of such regions, — coordination of the training activities defined in the specific programmes under the first, second and third areas of activity of the fourth framework programme, — return of researchers from less-favoured regions, encouraged and granted financial support, — accompanying measures to contribute to the programme's objectives (to encourage the training and mobility of researchers), in particular the development of a 'Euroconferences' system, practical courses, prizes for young scientists, publication and dissemination of the results of the programme, seminars and examination of the measures to be taken, with the aid of studies, workshops and seminars. TITLE B6-8

INDIRECT ACTION (SHARED-COST ACTIVITIES), CONCERTED ACTION AND SUPPLEMENTARY PROGRAMMES — EAEC FRAMEWORK PROGRAMME (1994 TO 1998)

Article Item	Remarks
	These remarks apply to all the budget headings in Title B6-8. Treaty establishing the European Atomic Energy Community, and in particular Article 7 thereof. Commission communication to the Council and the European Parliament of 12 May 1993 'Cohesion and RTD policy — synergies between research and technological development policy and economic and social cohesion policy' (COM(93) 203 final). The appropriations entered in the articles or items of this title are essentially intended to cover expenditure on contracts for the implementation of the programmes in question, in particular research contracts, contracts of association, study contracts, contracts for integrated projects, monitoring and evaluations of projects under the specific programmes and the framework programme, specific assessments, coordination and cooperation, and contracts covering grants, subsidies, the training and mobility of scientists, participation in international agreements, and the provision of facilities and equipment. They also cover expenditure on staff whether covered by the Staff Regulations or not, studies, meetings of experts, conferences, congresses, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure and operations linked with the achievement of the objective of the measure of which they form an integral part, including the action and measures necessary for preparation and monitoring of the Community's RTD strategy. Also entered against these items or articles are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest and the funding of high-level scientific and technological analyses and evaluations carried out to investigate new areas of research suitable for Community action. These appropriations also cover the costs of the general measures to increase the synergies between the action taken under the Structural Funds and the RTD activities, as indicated in the Commission communication of 12 May 1993 (COM(93) 203 final). These measures include promotion and implementation of the RTD programmes in the operational programmes under the Structural Funds in the Objective 1 regions (1994 to 1999); the provision of scientific and technological expertise to bolster the research and technological capacity of the less-favoured regions (Stride/SME initiative); assistance for specific sectors, such as rural development and small businesses, in defining scientific and technlogical guidelines and, finally, examination of the measures to be taken, with the aid of studies, workshops and seminars. Also entered against these items or articles are the costs of the action taken by the Commission to promote coordination of the research and technological development activities in order to keep the national policies and Community policy consistent. This action will entail concertation between the Member States and the national and European scientific bodies on the policies and measures taken at national (and, in particular, sectoral) level. They will be based on fuller information on the scientific and technological potential of the Member States and on the programmes implemented and will aim at gradual harmonization of the measures taken by the Member States to create favourable conditions for the development of scientific and technological research. The illustrative breakdown of appropriations by type of expenditure is derived from the table of equivalence set out in Annex I to this part of the statement of expenditure in this section (booking codes 1 to 6). The possibility of European third countries or organizations in third countries taking part in European cooperation in the field of scientific and technical research (in particular COST) is envisaged in the case of some of these projects. Any financial contribution will be entered in Article 6 0 2 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 96 (1) of the Financial Regulation of 21 December 1977 applicable to the general budget of the European Communities (OJ No L 356, 31. 12. 1977, p. 1), as last amended by Regulation (EC, Euratom, ECSC) No 2335/95 (OJ No L 240, 7. 10. 1995, p. 12). Any revenue from third parties sharing the cost of projects with the Community (firms in European Free Trade Association Member States, industrial consortia, etc.) entered in Article 6 0 4 of the statement of revenue may lead to additional appropriations being made available in accordance with Article 96 (1) of the Financial Regulation. Additional appropriations will be made available under Article B6-5 4 1.

CHAPTER B7-30 — COOPERATION WITH ASIAN DEVELOPING COUNTRIES

Article Item | Remarks

B7-300 *Former Item B7-3000*

Council Regulation (EEC) No 443/92 of 25 February 1992 on financial and technical assistance to and economic cooperation with developing countries in Asia and Latin America (OJ No L 52, 27. 2. 1992, p. 1).

This appropriation is intended to cover development schemes in Asian developing countries, in particular the poorest of them, aimed at tackling macro-economic and sectoral problems. Emphasis is placed on operations influencing economic organization and institutional development, and operations concerning the environment, the education of women, drug abuse control, democratization, regional cooperation, disaster anticipation and reconstruction measures.

Investments on lands traditionally inhabited by indigenous peoples or by other local communities, and other projects significantly affecting their livelihood or social organization, shall not be carried out without, as far as possible, their prior consultation and informed consent.

At least 10 % of these funds are to be used for environmental policies resulting from the Agenda 21 Programme agreed at the United Nations Conference on Environment and Development, held in Rio de Janeiro from 3 to 14 June 1992.

This appropriation also covers expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

Also charged to this article is expenditure on operations and other measures of a horizontal nature to enhance the profile or increase awareness of European Union cooperation with Asian developing countries.

This appropriation also covers small loans and credits granted through the informal banking system (through the Grameen Bank and similar operations in Bangladesh) that support, in particular, initiatives to promote employment for women.

The commitment appropriation authorized for 1996 is ECU 323 000 000.

Council Decision 90/674/EEC of 19 November 1990 concerning the conclusion of the Agreement establishing a European Bank for Reconstruction and Development (OJ No L 372, 31. 12. 1990, p. 1).

The Bank's aim is to facilitate the transition of the central and eastern European countries' economies to a market economy, and to promote private initiative and an entrepreneurial spirit there (Article 1 of the Agreement), by contributing to the progress and economic reconstruction of those countries that undertake to honour and put into practice the principles of pluralistic democracy, pluralism and the market economy.

The European Community has subscribed for 30 000 shares of a par value of ECU 300 000 000, which represents 3 % of the Bank's initial authorized capital (ECU 10 000 000 000). The Agreement establishing the Bank stipulates that the called-up capital should represent 30 % of the subscribed initial capital and be paid up in five equal annual tranches. Consequently the Community has made ECU 90 000 000 available in five annual tranches of ECU 18 000 000.

The payment of the fifth and final instalment was made in 1995.

This operation falls under the Euratom Treaty and constitutes a back-up to the Commission's policy on nuclear safety: safety of proven reactors, safety of future generations of reactors and safety of fuel cycle installations. It concerns the harmonization at European level of safety methodologies, practices, criteria, rules and requirements and the establishment of a strategy for waste management in accordance with the Council resolutions of 22 July 1975 and 15 and 18 June 1992 on the technological problems of nuclear safety. It is also aimed at fostering the transfer to the countries of central and eastern Europe, by means of intensified cooperation in accordance with Article 101 of the Euratom Treaty, of concrete knowledge of the established European Union approach to safety, in order to help them bring their nuclear installations up to safety levels equivalent to those in use in the European Union. The operation calls for highly specialized studies by experts, organizations or consortia qualified in the relevant matters. This appropriation is intended to cover expenditure on studies, meetings of experts, conferences, congresses, information and publications directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general administration (Commission communication of 22 April 1992).

European Parliament resolution of 10 September 1991 on scientific and technological cooperation with countries and organizations outside Europe (OJ No C 267, 14. 10. 1991, p. 49).

The activities financed under the Avicenne programme are based on the historic, economic and cultural links between the European Union and the countries concerned. They come under the legal framework of the agreements concluded between these countries and the European Union.

They opened the way to a wide-ranging scientific and technological cooperation programme with the Maghreb countries and other Mediterranean countries, comparable in nature and scope, *mutatis mutandis*, to that already implemented with a view to cooperation with the countries of central and eastern Europe and the Independent States of the former Soviet Union.

The programme includes the setting-up, with funding from this appropriation, of a scientific and technological cooperation network between the Maghreb countries and the other Mediterranean countries.

It includes:

— cooperation between universities and other research institutions,

— exchange of students, professors and research workers.

The activities are currently covered by the fourth technological R&D framework programme.

This appropriation is intended to enable commitments entered into to be met.

	This appropriation is intended to cover the financing of operations for the protection, regeneration, and rational management of tropical forests and for stabilizing the number of residential areas in the vicinity of such forests, particularly forests of vital importance for global phenomena such as climatic change and cultural and biological variety. Priority will be given to projects where the local population, being the most suitable persons for conservation of tropical forests, are fully involved. Coordinated specific action is necessary to complement more *ad hoc* operations undertaken with Item B7-5 0 4 0 assistance to international programmes promoting tropical forests.
	This appropriation is also used, pursuant to the United Nations Conference on Environment and Development meeting in Rio de Janeiro from 3 to 14 June 1992, to finance a number of pilot operations for the protection, regeneration and rational management of tropical forests. These projects must be developed in full cooperation with local communities, NGOs, regions and specialists from the region, and of course in cooperation with the governments, to ensure a better future for those whose livelihoods depend on forests. To ensure effective results, projects involving tropical forests should be financed for a maximum of five years or in two phases if they last longer.
	This appropriation also covers expenditure on pure and applied research under the supervision of people from the region, and miscellaneous meetings, conferences, publications and exchange of information within the region where the tropical forest is situated, directly linked with the achievement of the objective of the measure of which they form an integral part; this excludes expenditure involved in the management of these measures or in general expenditure (Commission communication of 22 April 1992).

Target groups and communities should be involved in the planning and implementation of each project. This appropriation is intended to cover a Community contribution to the United Nations Fund for Drug Abuse Control, partly to finance its activities in the developing countries, and partly to finance direct action benefiting those countries such as the prevention and reduction of drug abuse and illicit production of drugs, and the control of drug trafficking, the diversion of precursors and money laundering in those countries. Such action may include the supply of equipment and technical assistance required. It also covers the support of the anti-drugs programme in the Andean States of Colombia, Peru, Bolivia and Ecuador. It constitutes part of the funds for implementing the Community's policy on combating drug abuse. This appropriation is intended to cover measures to initiate the return to a normal life of people in developing countries in the aftermath of critical situations arising out of war, civil conflict or natural disasters. The overall aim is to provide speedy and decisive support for the rehabilitation of such countries whose fragile economies and weak institutional structure make it difficult for them to take up traditional forms of long-term aid, but whose needs are beyond the scope of the usual kind of humanitarian aid. Operations covered will include: — helping to restore productive facilities by supplying inputs, tools and spares for a limited period, — restoring the basic infrastructure required to meet essential needs (rural health networks, primary education, water supply and sanitation),

Council Decision 92/421/EEC of 13 July 1992 on a Community action plan to promote tourism (OJ No L 231, 13. 8. 1992, p. 26).

This article is intended for pilot projects to promote the European Union as a destination for tourists from third countries, especially the United States and Japan.

The promotional campaigns should be expanded to include new specialist facilities for tourists, for example facilities for the disabled and in the areas of culture, the countryside and sport. A close look should be taken at the use of television as an effective means of promotion.

This article also covers publicity campaigns in the United States and Japan. In future, south-east Asia, Australia and South America will also have to be included in such campaigns in order to attract tourists from those regions.

This article is intended to promote both access to non-Community markets in the light of the agreements reached in the Uruguay Round, which has created new opportunities for European industry, and a worldwide trading system.

European activities in relation to market access will focus on markets which are in full expansion but difficult to penetrate and could respond to the critical mass that a pan-European approach might offer.

The Far East, South-East Asia and the Middle East are considered the priority areas although other new markets could also be the focus of specific additional measures.

European Union activity will concentrate mainly in the sectors at the cutting-edge in an attempt to enhance European industry's competitiveness and its image of technological effectiveness especially in the areas of high technology, telecommunications, energy, the environment, health and transport.

This article also covers activities designed to help the European Union's textiles, clothing, leather goods and footwear industries win new markets. The main focus of effort will be markets which have previously been difficult to access and also those which are now opening up as a result of the agreements on market access in the Uruguay Round.

Targeting markets

This article is intended to cover notably:

— financing studies of these markets,

CHAPTER B0-2 2 — GUARANTEES FOR LOANS GRANTED BY OUTSIDE BODIES *(cont'd)*

Article Item	Remarks
B0-2 2 0	*(cont'd)* Council Decision 95/484/EC of 30 October 1995 on the conclusion of a Protocol on financial and technical cooperation between the European Community and the Republic of Malta (OJ No L 278, 21. 11. 1995, p. 14). Council Decision 95/485/EC of 30 October 1995 on the conclusion of a Protocol on financial and technical cooperation between the European Community and the Republic of Cyprus (OJ No L 278, 21. 11. 1995, p. 22). Pursuant to the Council Decision of 8 March 1977 referred to above the European Union guarantees loans made by the European Investment Bank in the context of the European Union's financial commitments in respect of the Mediterranean countries. This Decision was the basis for a contract of guarantee between the EEC and the European Investment Bank signed in Brussels on 30 October 1978 and in Luxembourg on 10 November 1978 setting up a comprehensive guarantee, equal to 75 % of all the funds available for loan operations in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Syria, Israel, Jordan, Egypt, the former Yugoslavia and Lebanon. In addition, by way of exception, a 100 % guarantee covers funds allocated as emergency aid for Portugal under the Council Decision of 7 October 1975. A new instrument extending the contract of guarantee is drawn up for each new financial protocol. The amount of the comprehensive guarantee is shown in Part D (Table 3) of Annex II to this part of this section of the statement of expenditure. This article constitutes the structure for the guarantee provided by the European Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default. Any appropriations needed will be allocated to this article by transfer, by re-use of amounts repaid in accordance with Article 27 (3) of the Financial Regulation of 21 December 1977 applicable to the general budget of the European Communities (OJ No L 356, 31. 12. 1977, p. 1), as last amended by Regulation (EC, Euratom, ECSC) No 2335/95 (OJ No L 240, 7. 10. 1995, p. 12), or by supplementary and/or amending budget. In order to honour its obligations the Commission may draw on its cash resources in order to service the debt provisionally. In this case Article 12 of Council Regulation (EEC, Euratom) No 1552/89 of 29 May 1989 implementing Decision 88/376/EEC, Euratom on the system of the Communities' own resources (OJ No L 155, 7. 6. 1989, p. 1), will apply. Annex II gives a summary of borrowing and lending operations, including debt management, in respect of capital and interest.
B0-2 2 1	Council Decision 90/62/EEC of 12 February 1990 granting a Community guarantee to the European Investment Bank against losses under loans for projects in Hungary and Poland (OJ No L 42, 16. 2. 1990, p. 68). Council Decision 91/252/EEC of 14 May 1991 extending to Czechoslovakia, Bulgaria and Romania Decision 90/62/EEC granting the Community guarantee to the European Investment Bank against losses under loans for projects in Hungary and Poland (OJ No L 123, 18. 5. 1991, p. 44). Council Decision 93/166/EEC of 15 March 1993 granting a Community guarantee to the European Investment Bank against losses under loans for investment projects carried out in Estonia, Latvia and Lithuania (OJ No L 69, 20. 3. 1993, p. 42). Council Decision 93/696/EC of 13 December 1993 granting a Community guarantee to the European Investment Bank against losses under loans for projects in central and eastern European countries (Poland, Hungary, the Czech Republic, the Slovak Republic, Romania, Bulgaria, Estonia, Latvia, Lithuania and Albania) (OJ No L 321, 23. 12. 1993, p. 27). Decision 90/62/EEC was the basis for a contract of guarantee between the European Economic Community and the European Investment Bank signed in Brussels on 24 April 1990 and in Luxembourg on 14 May 1990 as regards Hungary and Poland and for the extension of that contract to cover Czechoslovakia, Romania and Bulgaria, signed in Brussels and in Luxembourg on 31 July 1991. This contract of guarantee was the subject of an instrument signed in Brussels on 19 January 1993 and in Luxembourg on 4 February 1993 to replace the Czech and Slovak Federal Republic by the Czech Republic and the Slovak Republic from 1 January 1993. Decision 93/696/EC is the basis for a contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 22 July 1994 and in Luxembourg on 12 August 1994. This article constitutes the structure for the guarantee provided by the European Union. It will enable the Commission, if necessary, to service the debt (repayment of principal, interest and other costs) should a debtor default on the loans granted by the European Investment Bank for a maximum total amount of ECU 4 700 000 000.

Part B — Annex II
(Borrowing and lending)

A. INTRODUCTION

This Annex is drawn up in accordance with Article 20 (5) (c) of the Financial Regulation of 21 December 1977 applicable to the general budget of the European Communities (OJ No L 356, 31. 12. 1977, p. 1), as last amended by Regulation (EC, Euratom, ECSC) No 2335/95 (OJ No L 240, 7. 10. 1995, p. 12).

It provides information about the amounts of the borrowing and lending operations guaranteed by the general budget: loans for balance of payments support, Euratom and NCI loans and European Investment Bank loans to Mediterranean Basin countries and, from 1991 onwards, borrowing operations to provide medium-term financial assistance to non-member countries, European Investment Bank loans in the countries of central and eastern Europe, European Investment Bank loans for projects of mutual interest in certain third countries (developing countries in Asia and Latin America), European Investment Bank Loans to South Africa, the credit guarantee contracted by the former Soviet Union with a pool of commercial banks to finance imports of agricultural products and foodstuffs from the European Union and, since March 1994, Euratom borrowings to contribute to the financing required for improving the degree of efficiency and safety of nuclear power stations in certain non-member countries.

The main developments affecting the amounts of Community borrowings outstanding in 1994 were the decline in operations within the European Union (NCI: ECU 611 000 000; Euratom: ECU 223 000 000 and balance of payments: ECU 200 000 000 and the disbursement of loans outside the European Union to Algeria (ECU 150 000 000), Bulgaria (ECU 70 000 000) and Moldova (ECU 25 000 000).

At 31 December 1994, outstanding operations covered by the general budget totalled ECU 13 769 000 000; of this total ECU 7 843 000 000 was inside the European Union and ECU 5 925 000 000 outside.

B. BRIEF PRESENTATION OF THE VARIOUS CATEGORIES OF BORROWING AND LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

I. SINGLE FACILITY PROVIDING MEDIUM-TERM FINANCIAL ASSISTANCE FOR MEMBER STATES' BALANCES OF PAYMENTS

2. **Description**

In accordance with Regulation (EEC) No 1969/88 the European Union may grant loans to Member States which are experiencing, or are seriously threatened with, difficulties with their balance of payments. The outstanding amount of such loans is limited to ECU 16 000 000 000 in principal.

To this end, the Commission is empowered, on behalf of the European Community, to borrow on the capital markets or from financial institutions. The budget guarantee covers these borrowing operations. The outstanding amount of loans granted under this facility is limited to ECU 14 000 000 000 in principal. The balance compared with the ceiling of ECU 16 000 000 000 may be raised by recourse to the Member States.

For calculating the available balance of the authorized ceiling the exchange rate for lending operations is that of the day on which they are concluded and for loan repayments the exchange rate is that of the day on which the corresponding loan was concluded.

Outstanding amounts on current Community loans under Regulation (EEC) No 682/81 count against the ceiling.

Decisions to grant loans to Member States are adopted by the Council acting by a qualified majority.

Loans are subject to the adoption by the Member State of economic policy measures which will restore a tolerable balance of payments situation.

The loans are managed by the European Monetary Institute.

3. **Effect on budget**

Since both parts of these borrowing and on-lending operations are carried out on identical terms, they affect the budget only if the guarantee is activated should a debtor default.

II. EURATOM BORROWING AND LENDING OPERATIONS

1. **Legal basis**

Council Decision 77/270/Euratom of 29 March 1977 empowering the Commission to issue Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ No L 88, 6. 4. 1977, p. 9).

Council Decision 77/271/Euratom of 29 March 1977 on the implementation of Decision 77/270/Euratom empowering the Commission to issue Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ No L 88, 6. 4. 1977, p. 11), authorizing an initial tranche of up to ECU 500 000 000.

Council Decision 80/29/Euratom of 20 December 1979 amending Decision 77/271/Euratom on the implementation of Decision 77/270/Euratom empowering the Commission to contract Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ No L 12, 17. 1. 1980, p. 28), increasing from ECU 500 000 000 to ECU 1 000 000 000 the total amount of Euratom loans which the Commission is empowered to contract.

Council Decision 82/170/Euratom of 15 March 1982 amending Decision 77/271/Euratom as regards the total amount of Euratom loans which the Commission is empowered to contract for the purpose of contributing to the financing of nuclear power stations (OJ No L 78, 24. 3. 1982, p. 21), increasing from ECU 1 000 000 000 to ECU 2 000 000 000 the total amount of Euratom loans which the Commission is empowered to contract.

Council Decision 90/212/Euratom of 23 April 1990 amending Decision 77/271/Euratom applying Decision 77/270/Euratom empowering the Commission to issue Euratom loans for the purpose of contributing to the financing of nuclear power stations (OJ No L 112, 3. 5. 1990, p. 26), increasing from ECU 3 000 000 000 to ECU 4 000 000 000 the total amount of Euratom loans which the Commission is empowered to contract.

2. **Description**

The above Decisions empower the Commission to raise loans on behalf of the European Atomic Energy Community, the proceeds of which are for on-lending to finance investment projects involving the industrial generation of nuclear-based electricity and industrial fuel-cycle installations.

To reduce Europe's dependence on imported energy, the use of nuclear energy to generate electricity must be encouraged, with due account for safety and security requirements. Downstream from production, the investments necessary for the reprocessing and storage of waste will need to be promoted.

The borrowing and on-lending machinery set up by the European Atomic Energy Community enables electricity producers faced with a substantial increase in their investment and operating costs to make more extensive use of credit.

The loans raised are managed by the Commission, which, in conjunction with the European Investment Bank, also manages the loans granted.

On 18 July 1994 the Commission submitted a report to the Council and the European Parliament on Euratom borrowing and lending as part of the annual report on Community borrowing and lending operations for 1993 in accordance with Article 4 of Decision 77/270/Euratom.

3. **Effect on budget**

Since both parts of these borrowing and on-lending operations are carried out on identical terms, they affect the budget only if the guarantee is activated should a debtor default.

Council Decision 81/1013/EEC of 14 December 1981 on Community aid granted by way of exception for the reconstruction of the regions affected by the Greek earthquakes in February and March 1981 (OJ No L 367, 23. 12. 1981, p. 27), which took effect retrospectively from 1 January 1981, authorizing the Commission to contract loans up to ECU 80 000 000 in principal after deduction of any amounts lent by the European Investment Bank out of its own resources for the same purpose.

2. **Description**

(a) *NCI*

The above instruments empower the Commission to raise loans on behalf of the European Community, the proceeds of which are for on-lending to finance investment projects which contribute to greater convergence and integration of the economies of the Member States. These projects must help attain the priority European Union objectives in the energy, industry and infrastructure sectors, and assist the financing of investment by small- and medium-sized undertakings in productive sectors and the promotion of new technologies and innovation taking account of *inter alia* the regional impact of the projects and the need to combat unemployment.

The New Community Instrument borrowing ceilings, like those for the other Community financial instruments, are fixed by unanimous decision of the Council. However, the New Community Instrument tranches — which under NCI I and II were also fixed by unanimous Council decision — are now authorized, following Decision 83/200/EEC, by the Council acting by a qualified majority.

Within the limits of the tranches authorized by the Council, the Commission borrows on the capital markets; under a cooperation agreement between the Commission and the European Investment Bank, the Bank, subject to the Commission's decision on the eligibility of projects, is authorized to take decisions on the granting of loans and to manage them.

In accordance with Article 6 of Decision 78/870/EEC, Article 10 of Regulation (EEC) No 1736/79 and Article 7 of Decisions 81/19/EEC, 82/268/EEC and 83/200/EEC the Commission, on 18 July 1994, submitted a report to the Council and the European Parliament covering 1993 on:

— NCI borrowing and lending operations,

— European Union aid granted by way of exception for the reconstruction of the regions affected by the Italian earthquake in November 1980 and the Greek earthquakes in February and March 1981.

In addition, in accordance with Article 6 of Decision 83/200/EEC the Commission sends the Council and the European Parliament six-monthly reports on the rate of utilization of NCI tranches.

On 31 December 1993 there was only some ECU 257 600 000 still available under the various NCIs (including NCI-earthquakes).

(b) *NCI — Earthquakes*

By extension of the initial provisions of the New Community Instrument and by way of sole exception, the Commission is empowered to contract loans for the purpose of financing investments for the reconstruction of the means of production and the economic and social infrastructure in the regions of southern Italy and Greece affected by the earthquakes of 23 November 1980 and February and March 1981 respectively.

The amount which the Commission is allowed to raise is limited to ECU 1 000 000 000 for Italy and ECU 80 000 000 for Greece, less any amounts lent by the European Investment Bank from its own resources.

The budget guarantee covers the Commission's borrowing operations.

The entire ECU 80 000 000 for Greece was raised and on-lent in 1982 under the NCI. For Italy, ECU 965 000 000 out of the ECU 1 000 000 000 authorized had been paid out at 31 December 1992, 63 % under the NCI and 37 % from the European Investment Bank's own resources.

COMMISSION

Part B — Annex II
(Borrowing and lending)

Interest-rate subsidies of 3 % for a maximum of 12 years may be allowed by the European Union on loans of up to ECU 1 000 000 000 in principal granted for investment in the regions of Italy affected by the earthquake in November 1980 under the New Community Instrument for the promotion of investment in the Community in accordance with Article 1 of Decision 78/870/EEC, as supplemented by Article 1 of Decision 81/19/EEC, and/or by the European Investment Bank from its own funds.

Interest-rate subsidies of 3 % for a maximum of 12 years may be allowed by the European Union on loans of up to ECU 80 000 000 in principal granted for investment in the regions affected by the Greek earthquake disaster in February and March 1981 under the New Community Instrument for the promotion of investment in the Community in accordance with Article 1 of Decision 78/870/EEC, as supplemented by Article 1 of Decision 81/1013/EEC, and/or by the European Investment Bank from its own funds.

Finally, interest-rate subsidies of 3 % for a maximum of 12 years may be allowed by the European Union on loans of up to ECU 100 000 000 in principal granted by the European Investment Bank from its own funds for investment in the regions of Greece affected by the earthquake in September 1986, in accordance with Article 1 of Decision 88/561/EEC.

3. **Effect on budget**

These back-to-back borrowing and lending operations should not represent a direct charge on the general budget. The possibility of temporarily investing borrowed funds deposited by the Commission with the European Investment Bank (Treasury) as provided in Article 4 of the New Community Instrument Decisions should not affect the neutral nature, from the point of view of the charge to the budget, of borrowing and lending operations under this instrument.

The financial impact is confined to:

— activation of the guarantee should a debtor default,

— the associated interest-rate subsidies (earthquake loans).

IV. EUROPEAN COMMUNITY GUARANTEE FOR A PROGRAMME OF BORROWING CONTRACTED BY THE EUROPEAN UNION TO PROVIDE MEDIUM-TERM FINANCIAL ASSISTANCE TO HUNGARY

Council Decision 91/310/EEC of 24 June 1991 granting supplementary medium-term financial assistance to Hungary (OJ No L 174, 3. 7. 1991, p. 34).

2. **Description**

The European Union is granting Hungary a medium-term loan of up to ECU 870 000 000 in principal for a maximum of five years. The loan is intended to facilitate the adjustment of the Hungarian economy in a way which will enable it to derive all the benefits of a market-based economy. It will be made available in tranches.

The first tranche of ECU 350 000 000 was paid on 20 April 1990. A second tranche of ECU 260 000 000 was paid on 14 February 1991.

Arrangements concerning the payment of the third tranche and the relevant procedural agreement, including the question of guarantees, will be made at a later stage.

As the break-up of the Council for Mutual Economic Assistance (Comecon) and the Gulf crisis threatened to compromise the initial encouraging results of the reforms undertaken, it was decided to launch a supplementary borrowing and lending operation for ECU 180 000 000 under the overall ECU 360 000 000 group of 24 industrialized countries' aid programme.

The loan is being made available in two tranches. The first tranche of ECU 100 000 000 was paid to Hungary on 14 August 1991. The second tranche of ECU 80 000 000 was paid on 15 January 1993.

The Commission must report to the Council and Parliament at least once a year on the application of the concerned decisions.

3. **Effect on budget**

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external action (OJ No L 293, 12. 11. 1994, p. 1), any defaults are covered by this Fund within the limit of the amount available.

The effect on the budget is thus limited to:

— payment to the Fund of 14 % of the capital value of the lending and guarantee operations decided and committed since 1 January 1993,

— activation of the budget guarantee should the debtor default.

(b) *General budget guarantee*

Under the terms of the abovementioned Council Decision of 8 March 1977, the European Union guarantees loans to be granted by the European Investment Bank as part of the European Union's financial commitments towards the Mediterranean Basin countries.

This decision was the basis for the contract of guarantee signed by the European Economic Community and the European Investment Bank on 30 October 1978 in Brussels and 10 November 1978 in Luxembourg introducing a global guarantee of 75 % of all credit lines made available for loans in the following countries: Malta, Tunisia, Algeria, Morocco, Portugal (Financial Protocol, emergency aid), Turkey, Cyprus, Egypt, Jordan, Syria, Israel, Greece, former Yugoslavia and Lebanon.

In addition, by way of exception, a 100 % guarantee covers loans allocated for emergency aid to Portugal in accordance with Council Decision of 7 October 1975.

The contract of guarantee is extended for each new Financial Protocol. The level of the global guarantee is given in Section D (Table 3).

2. **Description**

Under the Financial Protocols concluded with Mediterranean Basin third countries, global amounts are laid down for loans to be granted by the European Investment Bank from its own funds. The European Investment Bank grants the loans for purposes which may contribute to the economic and social development of the countries in question (transport infrastructures, ports, water supply, production and distribution of energy, agricultural projects and promotion of small- and medium-sized businesses).

3. **Effect on budget**

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external action (OJ No L 293, 12. 11. 1994, p. 1), any defaults are covered by this Fund within the limit of the amount available.

The effect on the budget is thus limited to:

— payment to the Fund of 14 % of the capital value of the lending and guarantee operations decided and committed since 1 January 1993,

— activation of the budget guarantee should the debtor default.

COMMISSION

Part B — Annex II
(Borrowing and lending)

Previously, the guarantee was applied for the first time in February 1988. Since then the European Union has had to pay 11 times when Lebanon has defaulted. All the ECU 32 009 000 paid out has been repaid.

The guarantee was first applied for Syria in March 1990. Since then Syria has defaulted five times on a total of ECU 8 100 000 paid out. All this amount has now been repaid.

The guarantee was first applied for some of the Republics of the former Yugoslavia in October 1992. Since then the Commission has had to step in on five occasions. None of the ECU 28 572 899 paid out has been repaid,

— the granting, in a series of cases, of interest-rate subsidies of 2 % in non-repayable aid, subject to the overall amounts laid down by the Financial Protocols.

2. **Description**

In response to a call made by the Council on 9 October 1989, the Board of Governors of the European Investment Bank decided on 29 November 1989 to authorize the Bank to provide loans from its own resources to finance investment projects in Hungary and Poland for a total amount not exceeding ECU 1 000 000 000. These loans are granted to finance investment projects which satisfy the Bank's usual requirements for loans from its own resources.

On 14 May 1991 and 15 March 1993 the Council, acting on a proposal from the Commission and after consulting Parliament, decided that this guarantee should be extended to any loans that the European Investment Bank might make in the other countries of central and eastern Europe (Czechoslovakia, Bulgaria and Romania) over a period of two years up to a maximum of ECU 700 000 000.

On 13 December 1993 the Council, acting on a proposal from the Commission and after consulting Parliament, decided to renew for three years the European Union guarantee for ECU 3 000 000 000 in European Investment Bank loans for projects in Poland, Hungary, the Czech Republic, the Slovak Republic, Romania, Bulgaria, Estonia, Latvia, Lithuania and Albania.

The budget guarantee covers all aspects of debt-servicing (repayment of capital, interest, related costs) in connection with these loans.

The first tranche of ECU 185 000 000 was paid on 14 August 1991. It will be repaid in one instalment after seven years. The second tranche was paid in February 1992.

The separation into the Czech Republic and the Slovak Republic on 1 January 1993 meant that the loan contract had to be amended to divide the amount of the loan between each of the two Republics concerned.

The Czech Republic's share is ECU 250 000 000 and the Slovak Republic's ECU 125 000 000.

Technical notes on Tables 1 to 3

1. *Tables 1 and 2*

(a) For balance of payments, 'NCI' and 'Euratom' operations the amounts borrowed should correspond to the amounts lent.

However, the funds borrowed may be exchanged under swap operations for other currencies (at different interest rates) and these currencies are then lent.

Divergent movements in the parities against the ecu of the currencies borrowed and lent are the reasons for the differences between the columns 'Repayments' and 'Amount outstanding' for borrowing and lending operations.

The differences in interest rates for the currencies used in borrowing and lending operations are the reasons for differences in the column 'Interest' for these two types of operations.

(b) Exchange rate: the amounts in Column (2) 'Equivalent at date of signature' are converted at the rate applicable on the date of signature. As regards refinancing operations, Table 1 shows both the initial operation (e.g. in 1979) and the replacement operation (e.g. in 1986), the amount for the latter being converted at the rate of the initial operation. The resulting duplication affects the annual figures but is eliminated in the total.

All other amounts are converted at the rate applicable at 31 December 1994.

(c) Column (3) 'Initial amount received/paid up to 31 December 1994'. With reference to 1986, for example, this column shows the cumulative total of all amounts:

— received up to 31 December 1994 in respect of loans raised in 1986 (Table 1), including refinancing operations (hence some duplication),

— paid up to 31 December 1994 in respect of loans granted in 1986 (Table 2).

(d) Column (4) 'Amount outstanding at 31 December 1994': these are net figures, with no duplication as a result of refinancing operations. They are obtained by subtracting from the Column (3) figure the cumulative total of repayments made up to 31 December 1994, including repayments in respect of refinancing operations (total not given in the tables).

(e) Column (7) = Column (4) − Column (5).

(f) Column (8) = Column (7) − Column (6).

2. *Table 3*

(a) Column (2) 'Authorized credit line': this corresponds to the overall allocation laid down in the Cooperation Agreement/Financial Protocol.

(b) Column (3) 'Loans made available (less cancellations)': this relates to loans signed.

(c) European Union guarantee: the global 75 % guarantee is equivalent to 75 % of all loans provided, which totalled ECU 4 087 000 000 at the end of 1994. As the amount outstanding at 31 December 1994 was ECU 2 158 000 000, the theoretical maximum loss in respect of the global guarantee would be the same. The total risk to the European Union in respect of EIB loans is thus ECU 2 158 000 000 under the global guarantee and ECU 622 000 000 under the full guarantee (Portugal, central and eastern Europe, Asia and Latin America).

CHAPTER 26 — STUDIES, SURVEYS AND CONSULTATIONS

CHAPTER 27 — PUBLISHING AND INFORMATION

Article Item	Remarks
260	As part of its audit work, the Court has to call on outside experts for technical studies and analyses (chemical, physical and statistical studies). The special and sometimes unforeseeable nature of the work the Court entrusts to outside firms is in itself justification for the Court's having appropriations available to cover such studies, without which it could be seriously hampered in performing its duties and its independence could be jeopardized. This appropriation also includes an amount of ECU 16 000 to cover the expenses incurred on the audit of the Court of Auditors' accounts by independent auditors. The report of this audit is published in the *Official Journal of the European Communities*.
270	This appropriation is intended to cover publications by the Court of Auditors in the *Official Journal of the European Communities*, particularly the annual report, opinions issued in accordance with the provisions of Article 209 of the Treaty establishing the European Community, special reports, notices of open competitions and the Court of Auditors' participation in joint costs such as monthly and annual tables. The proceeds of the sale of the Official Journal, estimated at ECU 50 000, are entered as revenue in the budget.
271	
2710	This appropriation is intended to cover the cost of printing and distributing documents on general audit work and on the activities of the Court of Auditors.
2719	This appropriation is intended to cover expenditure on printing and circulating publications relating to the rôle and functioning of the Court of Auditors (leaflets, the Court of Auditors' brochures, interinstitutional directories, etc.).
272	This appropriation is intended to cover expenditure resulting from information meetings on the activities of the Court of Auditors, for the benefit of university teachers, editors of specialized journals or other specialist visitors from the Member States.
273	This appropriation is intended to cover the cost of periods of in-service training at the Court of Auditors.
