(*) Limit of analytical determination

(**) Pesticide-code combination for which the MRL as set in Annex III Part B applies.

(+) Pesticide-product combination for which a footnote exists. The list of footnotes is provided below.

►**M7** (1) Temporary MRLs valid until 1 June 2010, pending the European Food Safety Authority's residue data opinion. After this date the MRL will be 0,1 mg/kg, unless modified by a Regulation. ◄

(2) Temporary MRL valid until 18 September 2008. After this date the MRL will be 0,05 (*) mg/kg unless modified by a Directive or a Regulation.

(3) Temporary MRL valid until 31 December 2008 to accomodate and essential use in accordance with regulation 2076/2002/EC.

(13) As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propineb, ziram and/or thiram is required.

►**M5** (14) Monitoring data show that levels up to 0,02 mg/kg of dieldrin can be found in pumpkin seeds used for oil extraction. ◄

(a) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(F) = Fat soluble

(R) = The residue definition differs for the following combinations pesticide-code number:

►**M21** Carbendazim — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim ◄

Chlordane — code 1000000: Sum of cis- and trans-isomers and oxychlordane expressed as chlordane

►**M5** Clofentezine — codes 0500000 and 1000000: Sum of all compounds containing the 2-chlorobenzoyl moiety expressed as clofentezine ◄

►**M37** Metabolite 490M1 = 2-methoxyimino-2-[2-(o-tolyloxymethyl)phenyl]acetic acid. Metabolite 490M9 = 2-[2-(4-hydroxy-2-methylphenoxymethyl)phenyl]-2-methoxy-iminoacetic acid ◄

▼M2

Milbemectin — code 0500000: Milbemectin

►M21 Thiofanate-methyl — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim ◄

►M103 (°) Relevant metabolites are 2-keto–ethofumesate, open-ring-2-keto-ethofumesate and its conjugate, expressed as ethofumesate ◄

▼M149

Captan (Sum of captan and THPI, expressed as captan) (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

code 1000000 except 1040000: Sum of THPI, 3-OH THPI and 5-OH THPI, expressed as captan; code 0151020: captan

▼M85

Dithiocarbamates (dithiocarbamates expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram)

In brackets the origin of the residue (ma: maneb; mz: mancozeb; me: metiram; pr: propineb; t: thiram; z: ziram).

The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP). It is therefore not appropriate to use these MRLs to check compliance with a GAP.

1,4-dimethylnaphthalene (R) (F)

(R) The residue definition differs for the following combinations pesticide-code number: 1,4-dimethylnaphthalene – code 1000000 except 1040000: Sum of 1,4-dimethylnaphthalene and its metabolite M23 free and conjugated, expressed as 1,4-dimethylnaphthalene

(F) Fat soluble

There is evidence that 1,4-dimethylnaphthalene could naturally occur in some plant compounds. Based on currently available monitoring data a temporary MRL is set at a value of 0,05 mg/kg pending the submission of further monitoring data to confirm it. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 2 August 2024, or, if that information is not submitted by that date, the lack of it.

▼M251

The following MRLs apply to dried wild mushrooms: 2,3 mg/kg for ceps, 1,2 mg/kg for dried wild mushrooms other than ceps. Recent monitoring data show that residues of nicotine occurs in dried ceps and dried wild mushrooms other than ceps. Scientific evidence is not conclusive to demonstrate that nicotine occurs naturally in the concerned crop and to elucidate its mechanism of formation. When re-viewing the MRL, the Commission will take into account the information, if it is submitted by 25 July 2029, or, if that information is not submitted by that date, the lack of it.

0280020 **Wild fungi**

Scientific evidence is not conclusive to demonstrate that nicotine occurs naturally in the concerned crop and to elucidate its mechanism of formation. Temporary MRL valid until 22 February 2026. After this date the MRL will be 0,4 mg/kg unless further modified by a Regulation in light of new information provided by 30 June 2025 at the latest.

▼M194

Chlormequat (sum of chlormequat and its salts, expressed as chlormequat-chloride)

Recent monitoring data show that chlormequat levels in pears are declining but still occur at levels above the limit of determination due to former uses and persistence in the trees. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 25 July 2029, or, if that information is not submitted by that date, the lack of it.

0130020	**Pears**

The European Food Safety Authority identified some information on crop metabolism as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 13 April 2019, or, if that information is not submitted by that date, the lack of it.

0401060	**Rapeseeds/canola seeds**

The following MRL applies to oyster mushrooms: 6 mg/kg. Monitoring data show that cross-contamination of untreated cultivated fungi may occur with straw lawfully treated with chlormequat. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 25 July 2023, or, if that information is not submitted by that date, the lack of it.

0280010	**Cultivated fungi**

▼M256

Mepiquat (sum of mepiquat and its salts, expressed as mepiquat chloride)

The following MRL applies to oyster mushrooms: 3 mg/kg. Monitoring data show that cross-contamination of untreated cultivated fungi may occur with straw lawfully treated with mepiquat. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 31 December 2030, or, if that information is not submitted by that date, the lack of it.

0280010	**Cultivated fungi**

▼M158

Chlorate (A)

(A) To take into account the specific situation of chlorate residues, in processed food (including for the purpose of this Regulation foodstuffs that have been derived using processes listed in Article 2(1)(n) of Regulation (EC) No 852/2004), that has come in contact with products containing chlorate residues, or that contains ingredients with such residues, such as processing aids or drinking water, used in compliance with the respective legal requirements, these additional contributions of chlorate residues should be taken into account when determining the permitted content of chlorate residues in or on the processed food products in accordance with Article 20 (1) of this Regulation. The burden of proof regarding the level of those additional contributions lies with the food and feed business operator.

(+) Includes raw milk, heat-treated milk and milk for the manufacture of milk-based products as defined in Regulation (EU) No 1308/2013. The MRL applies to milk ready for use (marketed as such or reconstituted as instructed by the manufacturer)

1020010	**Cattle**

▼M158

Chlorpropham (R) (F)

(R) The residue definition differs for the following combinations pesticide-code number: Chlorpropham - codes 1016000 and 1030000: chlorpropham and 3-chloro-4-hydroxyaniline conjugates, expressed as chlorpropham; Chlorpropham - code 1000000 except 1016000, 1030000 and 1040000 : Chlorpropham and 4'-hydroxychlorpropham-O-sulphonic acid (4-HSA),expressed as chlorpropham

(F) Fat soluble

Monitoring data show that there may be a contamination of potatoes above the default MRL of 0.01 mg/kg when stored in facilities with a history of chlorpropham use. This temporary MRL will be reviewed based on monitoring data submitted to the Commission by 31 December 2022 and thereafter by 31 December of each subsequent year. Food business operators should submit a report on the development and implementation of cleaning practices to the Commission together with the monitoring data by 31 December 2022, and updates to it in the subsequent years.

▼M2

([13]) As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propineb, ziram and/or thiram is required.

([a]) For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I.

(*) Limit of analytical determination

([F]) = Fat soluble

([R]) = The residue definition differs for the following combinations pesticide-code number:

▼M2

Carbendazim — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim

Chlordane — code 1000000: Sum of cis- and trans-isomers and oxychlordane expressed as chlordane

►M37 Metabolite 490M1 = 2-methoxyimino-2-[2-(o-tolyloxymethyl)phenyl]acetic acid. Metabolite 490M9 = 2-[2-(4-hydroxy-2-methylphenoxymethyl)phenyl]-2-methoxy-iminoacetic acid. ◄

Thiofanate-methyl — code 1000000: Carbendazim and thiophanate-methyl, expressed as carbendazim

▼M64

Carbaryl (F)

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

▼M209

Profenofos (F)

(F) Fat soluble

Recent monitoring data show that residues of profenofos occur in rose petals. Further monitoring data is necessary to compare the evolution of the occurrence of profenofos in rose petals. When re-viewing the MRL, the Commission will take into account the information, if it is submitted by 25 July 2029, or, if that information is not submitted by that date, the lack of it.

0631030 **Rose**

Recent monitoring data show that residues of profenofos still occur in herbs and edible flowers. Further monitoring data is necessary to compare the evolution of the occurrence of profenofos in herbs and edible flowers. When re-viewing the MRL, the Commission will take into account the information, if it is submitted by 22 February 2030, or, if that information is not submitted by that date, the lack of it

0256000 **(f) herbs and edible flowers**

0256010 **Chervil**

0256020 **Chives**

0256030 **Celery leaves**

0256080 **Basil and edible flowers**

0256090 **Laurel/bay leaves**

0256100 **Tarragon**

0256990 **Others (2)**

The following MRL applies to chilli peppers: 3 mg/kg.

0231020 **Sweet peppers/bell peppers**

▼M47

Quinoxyfen (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish

▼M56

MCPA and MCPB (MCPA, MCPB including their salts, esters and conjugates expressed as MCPA) (F) (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

MCPA and MCPB - code 1000000: MCPA, MCPB and MCPA thioethyl expressed as MCPA

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish

▼M53

Fenarimol

(+) The applicable maximum residue level for horseradish (*Armoracia rusticana*) in the spice group (code 0840040) is the one set for horseradish (*Armoracia rusticana*) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish

▼M76

Clofentezine (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Clofentezine - codes 0500000 and 1000000: Sum of all compounds containing the 2-chlorobenzoyl moiety expressed as clofentezine

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 Horseradish

▼M70

Carbofuran (sum of carbofuran (including any carbofuran generated from carbosulfan, benfuracarb or furathiocarb) and 3-OH carbofuran expressed as carbofuran) (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Carbofuran — code 1000000 except 1040000: 3-OH-carbofuran (free and conjugated) expressed as carbofuran

▼M70

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

▼M111

Dithiocarbamates (dithiocarbamates expressed as CS2, including maneb, mancozeb, metiram, propineb, thiram and ziram)

In brackets the origin of the residue (ma: maneb; mz: mancozeb; me: metiram; pr: propineb; t: thiram; z: ziram),

The MRLs expressed as CS2 can arise from different dithiocarbamates and therefore they do not reflect a single Good Agricultural Practice (GAP), It is therefore not appropriate to use these MRLs to check compliance with a GAP,

(+) (ma, mz, me, pr, t, z)

0130040 **Medlars**

0130050 **Loquats/Japanese medlars**

(+) (mz)

Bromophos-ethyl (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

▼M77

Camphechlor (Toxaphene) (F) (R)

(*) Indicates lower limit of analytical determination

(R) = The residue definition differs for the following combinations pesticide-code number:

Camphechlor — code 1000000 except 1040000: Sum of the three indicator compounds Parlar No 26, 50 and 62, where:

Parlar No 26 = 2-endo,3-exo,5-endo,6-exo,8,8,10,10-octachlorobornane

Parlar No 50 = 2-endo,3-exo,5-endo,6-exo,8,8,9,10,10-nonachlorobornane

Parlar No 62 = 2,2,5,5,8,9,9,10,10,-nonachlorobornane

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

Chlorbufam (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

Chloroxuron (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

Chlozolinate (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

Di-allate (sum of isomers) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

Dinoseb (sum of dinoseb, its salts, dinoseb-acetate and binapacryl, expressed as dinoseb)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040 **Horseradish**

▼M77

Dinoterb (sum of dinoterb, its salts and esters, expressed as dinoterb)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Dioxathion (sum of isomers) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

DNOC

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Ethylene oxide (sum of ethylene oxide and 2-chloro-ethanol expressed as ethylene oxide) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Fentin (fentin including its salts, expressed as triphenyltin cation) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Flucycloxuron (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Flucythrinate (flucythrinate including other mixtures of constituent isomers (sum of isomers)) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Formothion

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

▼M77

Mecarbam

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Methacrifos

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Monolinuron

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Phenothrin (phenothrin including other mixtures of constituent isomers (sum of isomers)) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Propham

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Pyrazophos (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Quinalphos (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Resmethrin (resmethrin including other mixtures of consituent isomers (sum of isomers)) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

▼M77

Tecnazene (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

▼M119

Bitertanol (sum of isomers) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

▼M121

Hexachlorocyclohexane (HCH), alpha-isomer (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Hexachlorocyclohexane (HCH), beta-isomer (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

Lindane (Gamma-isomer of hexachlorocyclohexane (HCH)) (F)

(+) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040) taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Regulation (EC) No 396/2005.

0840040	**Horseradish**

▼M139

Iprodione (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Iprodione - code 1000000 except 1040000: Sum of iprodione and all metabolites containing the 3,5-dichloroaniline moiety, expressed as iprodione.

▼M145

Diflubenzuron (F) (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Diflubenzuron - code 1000000: Sum of Diflubenzuron and 4 –chlorophenylurea expressed as Diflubenzuron.

▼M162

▼C16

Chlorpyrifos-methyl (F) (R)

(R)=The residue definition differs for the following combinations pesticide-code number: Chlorpyrifos-methyl - code 500000: sum of chlorpyrifos-methyl and desmethyl chlorpyrifos-methyl.

▼M166

Chlorothalonil (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Chlorothalonil - codes 1000000 to 1070000, except 1040000: 2,5,6-trichloro-4-hydroxyphtalonitrile (SDS-3701)

Pymetrozine (R)

(R) =The residue definition differs for the following combinations pesticide-code number: Pymetrozine - code 1020000: pymetrozine, 6-hydroxymethylpymetrozine and its phosphate conjugate, expressed as pymetrozine

▼M184

Propineb and its reaction products that are cleaved to propane-1,2-diamine (PDA), expressed as PDA (R)

(R) = The residue definition differs for the following combinations pesticide-code number:

Propineb - code 1000000 except 1020000 and 1040000: Propylenethiurea (PTU), free

Propineb - code 1020000: Propylenethiurea (PTU) free and conjugated

As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case-by-case basis when the specific quantification of propineb, ziram and/or thiram is required.

▼M200

Thiram (expressed as thiram)

(O) As all dithiocarbamates result in the final CS2 residue, discrimination among them is generally not possible. However single residue methods are available for propineb, ziram and thiram. These methods should be implemented on a case by case basis when the specific quantification of propineb, ziram and/or thiram is required.

▼M203

Bromoxynil and its salts, expressed as bromoxynil

The European Food Safety Authority identified some information on analytical methods as unavailable. When re-viewing the MRL, the Commission will take into account the information referred to in the first sentence, if it is submitted by 29 October 2016, or, if that information is not submitted by that date, the lack of it.
