COMMISSION IMPLEMENTING DECISION (EU) 2026/1706

of 8 July 2026

concerning certain emergency measures relating to infection with peste des petits ruminants virus in Croatia and repealing Implementing Decision (EU) 2026/1389 and Implementing Decision (EU) 2025/2663

(notified under document C(2026) 4904)

(Only the Croatian text is authentic)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/429 of the European Parliament and of the Council of 9 March 2016 on transmissible animal diseases and amending and repealing certain acts in the area of animal health ('Animal Health Law') ([1]), and in particular Article 259(1) thereof,

Whereas:

(1) Infection with peste des petits ruminants virus is an infectious disease affecting caprine and ovine animals, and it can have a severe impact on the concerned animal population and the profitability of farming causing disturbance to movements of consignments of those animals and products thereof within the Union and exports to third countries. In the event of an outbreak of peste des petits ruminants in caprine or ovine animals, there is a serious risk of the spread of that disease to other establishments of caprine or ovine animals.

(2) Commission Delegated Regulation (EU) 2020/687 ([2]) supplements the rules for the control of the listed diseases referred to in Article 9(1), points (a), (b) and (c), of Regulation (EU) 2016/429, and defined as category A, B and C diseases in Commission Implementing Regulation (EU) 2018/1882 ([3]). In particular, Articles 21 and 22 of Delegated Regulation (EU) 2020/687 provide for the establishment of a restricted zone in the event of an outbreak of a category A disease, including infection with peste des petits ruminants virus, and for certain measures to be applied therein. In addition, Article 21(1) of that Delegated Regulation provides that the restricted zone is to comprise a protection zone and a surveillance zone, and, if necessary, further restricted zones around or adjacent to the protection and surveillance zones.

(3) Commission Implementing Decision (EU) 2026/1389 ([4]) was adopted on 17 June 2026 on the basis of Regulation (EU) 2016/429 and lays down certain interim emergency measures relating to infection with peste des petits ruminants virus in Croatia. Specifically, Implementing Decision (EU) 2026/1389 provides that the protection, surveillance and further restricted zones to be established by that Member State, following an outbreak of infection with peste des petits ruminants virus, in accordance with Delegated Regulation (EU) 2020/687, are to comprise at least the areas listed in the Annex to that Implementing Decision.

([1]) OJ L 84, 31.3.2016, p. 1, ELI: http://data.europa.eu/eli/reg/2016/429/oj.

([2]) Commission Delegated Regulation (EU) 2020/687 of 17 December 2019 supplementing Regulation (EU) 2016/429 of the European Parliament and the Council, as regards rules for the prevention and control of certain listed diseases (OJ L 174, 3.6.2020, p. 64, ELI: http://data.europa.eu/eli/reg_del/2020/687/oj).

([3]) Commission Implementing Regulation (EU) 2018/1882 of 3 December 2018 on the application of certain disease prevention and control rules to categories of listed diseases and establishing a list of species and groups of species posing a considerable risk for the spread of those listed diseases (OJ L 308, 4.12.2018, p. 21, ELI: http://data.europa.eu/eli/reg_impl/2018/1882/oj).

([4]) Commission Implementing Decision (EU) 2026/1389 of 17 June 2026 concerning certain interim emergency measures relating to infection with peste des petits ruminants virus in Croatia (OJ L, 2026/1389, 18.6.2026, ELI: http://data.europa.eu/eli/dec_impl/2026/1389/oj).

(4) Since the date of adoption of Implementing Decision (EU) 2026/1389, Croatia has notified the Commission, between 21 June and 2 July 2026 of seven additional outbreaks of infection with peste des petits ruminants virus in establishments where ovine and caprine animals are kept, located in the counties of Bjelovarska-Bilogorska and Viroviticko-Podravska. In accordance with Delegated Regulation (EU) 2020/687, Croatia has established restricted zones, which comprise protection and surveillance zones, where the disease control measures laid down in that Delegated Regulation are applied in order to prevent the further spread of that disease.

(5) In order to control the spread of the disease, to prevent any unnecessary disturbance to trade within the Union and to avoid unjustified barriers to trade being imposed by third countries, it is necessary to rapidly lay down, at Union level, in collaboration with Croatia, the location and duration of those restricted zones, which comprise the protection and surveillance zones, as well as further restricted zones, established by that Member State in accordance with Delegated Regulation (EU) 2020/687.

(6) In light of the epidemiological situation concerning infection with peste des petits ruminants virus in Croatia, and notably taking into account this new outbreak, the interim emergency measures foreseen in Implementing Decision (EU) 2026/1389 should be adjusted, both spatially and temporally, and continued in order to prevent the further spread of the disease in Croatia or to the rest of the Union. The updated list of areas where a restricted zone must be established in Croatia in respect of infection with peste des petits ruminants virus, as well as the envisaged duration of these zones, should, therefore, be set out in the Annex to this Decision.

(7) The size of the protection and surveillance zones, and the duration of the measures to be applied therein, is based on the criteria set out in Article 64(1) of Regulation (EU) 2016/429, as well as on the rules laid down in Annexes X and XI to Delegated Regulation (EU) 2020/687. The criteria applied for the choice of the size of the protection and surveillance zones, as well as of the duration of the measures to be applied therein, include a consideration of not only the epidemiological situation as regards infection with peste des petits ruminants virus in the areas affected by that disease, but also of the overall epidemiological situation of infection with peste des petits ruminants virus in the entire territory of Croatia, and of the level of risk for the further spread of the disease. For the determination of the duration of the measures provided for by this Decision, the international standards of the Terrestrial Animal Health Code of the World Organisation for Animal Health ([5]) (WOAH) have been taken into account.

(8) The areas identified as protection, surveillance and further restricted zones in Croatia should therefore be set out in Annexe I to this Decision accordingly, and the duration of that regionalisation should be fixed therein. The duration of that regionalisation takes into account the minimum periods for the measures to be applied in the protection and surveillance zones in accordance with Delegated Regulation (EU) 2020/687.

(9) In addition, Commission Implementing Decision (EU) 2025/2663 ([6]) was adopted on 23 December 2025, on the basis of Regulation (EU) 2016/429, and lays down certain emergency measures relating to infection with peste des petits ruminants virus in Croatia.

(10) Following further outbreaks of infection with peste des petits ruminants virus in Croatia, the Annex to Implementing Decision (EU) 2025/2663 was last amended by Commission Implementing Decision (EU) 2026/317 ([7]).

(11) As of 19 February 2026, the disease control measures provided for by Implementing Decision (EU) 2025/2663 were no longer required to be applied since, from the adoption of Implementing Decision (EU) 2026/317, no new outbreaks had been reported until 11 June 2026.

(12) Implementing Decision (EU) 2026/1389 and Implementing Decision (EU) 2025/2663 should, therefore, both be repealed by this Decision.

([5]) https://www.woah.org/en/what-we-do/standards/codes-and-manuals/terrestrial-code-online-access/.

([6]) Commission Implementing Decision (EU) 2025/2663 of 23 December 2025 concerning certain emergency measures relating to infection with peste des petits ruminants virus in Croatia (OJ L, 2025/2663, 30.12.2025, ELI: http://data.europa.eu/eli/dec_impl/2025/2663/oj).

([7]) Commission Implementing Decision (EU) 2026/317 of 5 February 2026 amending Implementing Decision (EU) 2025/2663 concerning certain emergency measures relating to infection with peste des petits ruminants virus in Croatia (OJ L, 2026/317, 10.2.2026, ELI: http://data.europa.eu/eli/dec_impl/2026/317/oj).

(13) Given the urgency of the epidemiological situation in the Union as regards the spread of infection with peste des petits ruminants virus and the need to prevent the disease from spreading from the affected establishments in Croatia to other parts of that Member State or to other Member States, the measures laid down in this Implementing Decision should apply as soon as possible.

(14) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed.

HAS ADOPTED THIS DECISION:

Article 1

Croatia shall ensure that:

(a) a restricted zone, which comprises protection and surveillance zones as well as a further restricted zone, is established immediately by the competent authority of that Member State in accordance with Article 21 of Delegated Regulation (EU) 2020/687, and under the conditions laid down therein;

(b) the protection, surveillance and further restricted zones referred to in point (a) comprise at least the areas listed in the Annex I to this Decision;

(c) the measures required to be applied in the protection, surveillance and further restricted zones, are applied at least until the dates listed in the Annex I to this Decision;

(d) movements of caprine and ovine animals from the protection, surveillance and further restricted zone to a destination located outside the external perimeter of the further restricted zone as provided for in Point B of Annex I to this Decision are prohibited until the dates listed for each zone in Annex I to this Decision;

(e) movements of caprine and ovine animals from the territory of Croatia to a destination located outside Croatia are prohibited until 30 September 2026.

Article 2

Croatia shall apply the measures which are applicable to further restricted zones, as provided for in Delegated Regulation (EU) 2020/687, in the areas listed in Annex II to this Decision, and in accordance with the dates set out therein.

Article 3

Implementing Decision (EU) 2026/1389 and Implementing Decision (EU) 2025/2663 are repealed.

Article 4

This Decision is addressed to the Republic of Croatia.

Done at Brussels, 8 July 2026.

For the Commission
Olivér VÁRHELYI
Member of the Commission
