COMMISSION DECISION

of 14 April 1980

refusing to accept the scientific character of the apparatus described as 'Collins General Purpose HF Receiver, model 651S-1' and 'Collins Transmitter, model HF 8130A'

(80/469/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 1798/75 of 10 July 1975 on the importation free of Common Customs Tariff duties of educational, scientific and cultural materials (1), as amended by Regulation (EEC) No 1027/79 (2),

Having regard to Commission Regulation (EEC) No 2784/79 of 12 December 1979 laying down provisions for the implementation of Regulation (EEC) No 1798/75 (3), and in particular Article 7 thereof,

Whereas, by letter dated 9 October 1979, the Italian Government requested the Commission to invoke the procedure at present laid down in Article 7 of Regulation (EEC) No 2784/79 in order to determine whether or not the apparatus described as 'Collins General Purpose HF Receiver, model 651S-1', and 'Collins Transmitter, model HF 8130A', intended for use in connection with stratosperic experiments in telemetry stations, should be considered as a scientific apparatus and, where the reply is in the affirmative, whether apparatus of equivalent scientific value is currently being manufactured in the Community;

Whereas, in accordance with the provisions of Article 7 (5) of Regulation (EEC) No 2784/79, a group of experts composed of representatives of all the Member States met on 26 February 1980 within the Committee on Duty-Free Arrangements to examine this particular case;

Whereas this examination showed that the apparatus in question consists of a high-frequency receiver and a high-frequency transmitter; whereas it does not possess the requisite objective characteristics making it specifically suited to scientific research; whereas apparatus of the same kind is principally used for the realization of non-scientific activities; whereas the use of the said apparatus in the case in question could not alone confer upon it the character of scientific apparatus; whereas it therefore cannot be regarded as scientific apparatus,

HAS ADOPTED THIS DECISION:

Article 1

The apparatus described as 'Collins General Purpose HF Receiver, model 651S-1', and 'Collins Transmitter, model HF 8130A', is not considered to be a scientific apparatus.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 14 April 1980.

For the Commission

Étienne DAVIGNON

Member of the Commission
