Updated Climate tracking and digital tagging of the Recovery and Resilience Plan of Denmark

The table below presents the detailed application of the climate tracking and digital tagging methodologies set out respectively in Annex VI and VII to Regulation (EU) 2021/241 in the modified Danish recovery and resilience plan.

Int. Field = intervention field.

Coeff. = Coefficient for the calculation of support to climate change objectives and to digital transition, on the basis of Annex VI and Annex VII of the RRF Regulation.

New or revised measures are marked in yellow to distinguish them from the unchanged measures in the RRP.

[1] While the total cost of the Danish recovery and resilience plan exceeds the total allocation of non-repayable financial support to Denmark, Denmark will ensure that all spending related to the investments mentioned in this table as contributing to climate objectives are fully financed by the funds from the Recovery and Resilience Facility.

[2] Reforms and investments in the REPowerEU chapter are not taken into account when calculating the plan's contribution to the digital target requirement set by Regulation (EU) 2021/241.
