This Staff Working Document accompanies the Annual Report on the implementation of the Dual-Use Regulation (EU) No 2021/821 setting up a Union regime for the control of exports, brokering, technical assistance, transit and transfer of dual-use items. The Staff Working Document contains 19 data reports which cover the year 2022.

The data in the report has been compiled thanks to a data collection exercise carried out recently with the Member States based on a recent Commission Recommendation (EU) 2024/214 ([1]), which provides guidelines and methodology on data gathering and processing. This new way of collecting data was one of the elements of the modernisation of the Dual-Use Regulation in 2021 and will feature in the annual report for the first time. The data contained in these reports is summarised in the said accompanying Annual Report.

([1]) Commission Recommendation (EU) 2024/214 of 10 January 2024 on guidelines setting out the methodology for data gathering and processing for the preparation of the annual report on the control of exports, brokering, technical assistance, transit and transfer of dual-use items pursuant to Regulation (EU) 2021/821 of the European Parliament and of the Council; ELI: http://data.europa.eu/eli/reco/2024/214/oj
